

ALTER DATE OF FIFTH CONCERT

Dasch Players to Appear on Wednesday, Feb. 4

An unexpected change in the schedule of the Chicago Symphony orchestra necessitates the postponement of the New Trier Township Orchestral Association's fifth concert from the

Rudolph Reuter

original date of Monday, February 2, to Wednesday, February 4, at New Trier high school. The afternoon young people's concert will also be given on Wednesday. Programs of unusual interest are being arranged by George Dasch, conductor of The Symphony Players of Chicago.

The Orchestral association announces the engagement of Rudolph Reuter, world-famous pianist, for an appearance with the orchestra on the evening program. Mr. Reuter has just recently returned from a concert tour of the principal countries of Europe where he earned the pointed praise of the best critics of the old world's music centers. His brilliant technique, for which the leading journal in Vienna used the term "sovereign," and the depth and imagination of his interpretation make his appearances, which in this season will extend to all parts of the United States, musical events of the first order.

One of the greatest masterpieces of piano literature, the Schumann concerto, will be Mr. Reuter's contribution to the New Trier program. The complete programs for both concerts will be printed in next week's issue.

Students Register for Semester at New Trier

New Trier High school's class schedules for the next semester are now ready and the business of getting new students enrolled has begun. All students in the township who wish to register at New Trier for the first time this semester are urged to come early. "First come, first served," is the motto. In registering pupils should first consult the dean of men or the dean of women.

Points out Dangers of Sleighing Behind Autos

Bob-sleigh riding behind automobiles should not be permitted, according to Dr. M. J. Bradley of the chemistry department of the University of Illinois, unless the cars are provided with a special exhaust pipe. The deadly fumes of carbon monoxide otherwise are inhaled by the occupants of the sled, he explains, and if the rope is short enough, death may occur in a few moments because the exhaust is being breathed directly.

The first symptom is generally a slight headache, then dizziness and suffocation with chills and numbness. Any concentration of carbon monoxide above four parts per 10,000 of air is dangerous if inhaled more than a few breaths. The exhaust from the automobile engine has many times this concentration.

The only way to prevent possible gas poisoning is to extend the exhaust pipe from the muffler upward until it reaches the top of the car thus exhausting the fumes and gases high into the air where concentration gradually decreases due to diffusion and air currents caused by the moving machine. Any car not equipped in this way should not be permitted to draw persons on sleds, said Mr. Bradley. This sport is also dangerous because of accidents which might occur with other passing vehicles and especially when turning corners.

ANNOUNCE EXTENSION PLAN AT HIGH SCHOOL

Huge extensions, planned to take care of the future needs of the fast growing communities which it serves, are planned by the officials of New Trier high school. The first item on this program will be the installation of a new heating system, which will be placed in a different position from the present one. A new oil burning furnace is being tried out, and if it proves satisfactory the entire new system will be of that type.

The moving of the heating plant will probably take place in the near future and the site will be the end of the soccer field. The present boys' gymnasium will be occupied by the shops and this change will be followed immediately by the construction of new class rooms on the site now occupied by the heating plant.

Principal Frederick E. Clerk has been busy for some time studying other buildings for the purpose of deciding the best style of architecture and the most modern and practical arrangement for New Trier's addition. When these changes are complete the high school will be able to take care of more than 2500 pupils without crowding.

Country Club Minstrels to Perform January 30

The minstrels will be in town late next week at the Ouilmette Country club where the "Frivolities" will be presented by a cast of 40 members of the club. Friday and Saturday January 30 and 31, are announced as the dates of the performances.

Patrons of the "Frivolities" are promised something "novel, new and up-to-date."

Rehearsals are being held under the direction of W. Jack Higgins. Tickets may be secured from members of the club or at local drug stores.

PACKARD ESTABLISHES FINE SERVICE STATION

The new Packard service station and salesroom on Railroad avenue at Clark street, Evanston, is now practically completed, the company announces, calling attention to the fact that it now has facilities in keeping with its remarkable growth of business.

The service department of the new institution has been in operation since December 22, and the sales angle will be stressed with the completion of the show room and offices.

The new station is intended for all Packard owners, especially those living in north shore suburbs, to whom the main plant at 37th street, Chicago, is inconvenient for the ordinary services, other than major repairs, which will continue to be done there.

The Evanston station is conveniently situated, having entrances both on Railroad avenue and Maple avenue. The same standard Packard service available at the main station in Chicago will be rendered Packard owners at this plant, it is announced.

JOIN AUTO SALES STAFF

A. L. Porter, familiarly known as "Porter", who for 10 years has been private chauffeur in a prominent Winnetka family, and Ernest Bartz, an expert in the automobile sales business, have taken positions with the Evanston Motor Sales, distributors of the Maxwell, Chrysler and Pierce-Arrow cars.

Mrs. Homer Cotton to Give Lecture on Music

In the absence of Miss Tina Mae Haines, music critic, who has been seriously ill, Mrs. Homer E. Cotton will present the first of a series of three lectures on music appreciation before the Woman's club of Wilmette at the club Monday afternoon, February 2, at 1:30 o'clock.

The lecture had been postponed because of Miss Haines' indisposition. It is planned to present the lectures on the days on which the Dasch Symphony Players appear in concert at New Trier auditorium.

It will help the boy advance in his studies if you give him a radio set as a goal to spur his endeavors. This electric shop is always ready to help you with your radio-problems.

1/5 off

your bill for fuel

The efficiency of Chicago Solvay Coke is greater than that of hard coal and the price is 20% less. Those who burn Chicago Solvay Coke—made especially for home heating—find that they have clipped one-fifth off their fuel bills and enjoy greater satisfaction as well. Why not cut your bill one-fifth?

Chicago Solvay Coke is a clean fuel. It does not fill the basement with grime. It burns with no smoke, no soot. There are few ashes to handle. All the disagreeable features of coal are eliminated in the processes of manufacture. Chicago Solvay Coke is the modern fuel for homes.

If you are interested in cutting your fuel bill one-fifth, have your heating plant looked over by one of our skilled Service Men and then order from your dealer the size of Chicago Solvay Coke the Service Man recommends. Reliable suburban fuel dealers will furnish you genuine Chicago Solvay Coke if you specify it by full name. He will also arrange for the Service Man to call.
