

## AID SOUTHWEST RAISIN GROWERS

### North Shore Men Plan to Utilize By-Products

Franklin deBeers, formerly of Glencoe, who went to Fresno, Calif., a year ago to prepare plans for a raisin syrup plant to be built by the Sun-Maid Raisin Growers' association, will be in Fresno at least a year longer in charge of the chemical engineering work in connection with the building and operation of the plant, construction on which will start immediately. The following article, clipped from a Fresno paper, indicates the size of the project.

"Enormous returns to the growers on sub-standard raisins are forecast in an announcement by the Sun-Maid Raisin Growers' association yesterday of the immediate construction of a plant for the manufacture of raisin syrup and other by-products.

"The announcement is the fulfilling of the statement made by Ralph P. Merritt, managing director of the association, during the course of his recent annual report to members, that the association was making plans for an increase in conversion methods.

"The plant, to be erected at Hamilton and Ellis streets, directly east of Plant No. 4, will cost one hundred thousand dollars, and is to be completed in June, so that marketing of the syrup can begin in July.

"A ton of raisins will make approximately 200 gallons of syrup. At 60 cents a gallon for the syrup, a ton of raisins, converted into syrup, will return to the association six cents a pound or \$120 a ton gross. If, as in 1923, there are 40,000 tons of raisins to go into conversion, all in syrup, then the gross return on the syrup would be practically five million dollars. The operating expenses, it is stated in the announcement, will be kept at a minimum through the production of other by products, including potassium acid tartrate, or crude cream of tartar, stock feeds, fertilizers and other things, the returns on which are expected to pay for much of the cost of operating the sugar unit."

Another Glencoe man who is working on this project is Carl S. Miner. He is head of the Miner laboratories of Chicago, which are in charge of all chemical research work on this project.

### "Changing World" to Be Further Class Discussion

Mrs. Maurice H. Lieber spoke at the meeting of the Winnetka Sunday Evening club last Sunday on the subject, "The Changing World." She touched on five of the most important elements in American life—the home, religion, industry, politics and education—and dwelt upon the tremendous changes which have come about in the past 40 years. Her talk was so interesting and evoked such a lively discussion that the club has decided to continue study along those lines.

Consequently, Mr. John Stahelin, who is the speaker for this Sunday, has based his talk on another phase of the same general subject. His topic is, "The Problem of the World's History," and will deal with changes in the world at large, as well as in America.

Supper will be served as usual at 6:30 o'clock in the Camp Fire room of Community House.

The Pitch-in Dinner club meets with Mr. and Mrs. Harold Hill, 801 Walden road, on Saturday night.

## MANY SUBJECTS FOR SERVICES

### Congregationalists Have a Busy Sunday

At the Winnetka Congregational church this Sunday morning at 11 o'clock Rev. James Austin Richards will preach on, "The Nearer Summons." The organ music for the morning will be from Guilman's Third Sonata, using the Adagio for the prelude, and the Allegro for the postlude.

At the Junior service of worship, at the same hour, the sermon will be "A Glimpse of the Present Situation in Russia."

The Church school meets at 9:30 o'clock, and has classes for all ages from the kindergarten up. The Men's class is to have an address by Dr. Edmund D. Soper to which it invites all above high school age. This meeting is held in the American Legion room of Community House.

In the evening, at 6:45 o'clock, the Young People's club will have one of its free and interesting discussions. The subject is "What should be considered in choosing a life-work?" John Roos is the leader; and there will be many points of view expressed, as so many of the young people are soon to leave high school for further study or business.

Mr. Richards will give the sixth and last lecture in the series on the book of Genesis, at 8 o'clock. The Joseph stories will be the subject.

The Boys' choir will give the music preceding the lecture. They have been practicing under the direction of Allyn Smith, and will sing "Consider and Hear Me," by Fleuger. The processional will be the March from Mendelssohn's "Athalie," and the recessional hymn "Onward Christian Soldiers."

#### CHICAGO YEARS AGO

Sixty years ago housewives considered gas service cheap at from \$6 to \$9 a thousand cubic feet.

#### LOTS OF UTENSILS

It takes seven million gas-cooking appliances to prepare food for the nation's population.

#### FIRST PHONE CALL

The first long distance telephone conversation between Boston and New York took place on March 27, 1884.

#### FIRST PHONE COMPANY

The first operating telephone company in the United States was formed on July 9, 1877.

### North Shore Wins Again From Parker School Five

North Shore 30—Francis Parker 11—read the final score. In the return game at Parker school, North Shore Country came out victor. Although the Winnetka boys earlier in the season had won a game from Parker by a large margin, they rather looked for a possible comeback from the Chicagoans in the return game, due to the smallness of Parker's gym.

The game was slow, and checked by Parker's many fouls. Parker shot baskets frantically, no matter from what position on the floor, trying many long shots, while North Shore, keeping its usual form, depended more upon passing and team play.

This morning will see a game with Milwaukee Country Day school, at Milwaukee.

#### BULK OF SERVICE

About 60 per cent of all the telephone wire in service throughout the world is in the United States of America. Less than 10 per cent of the world's total telephone wire is in Germany; and only about 7 per cent is in Great Britain.
