MUSIC LEADERS FORM SOCIETY

Music Guild of New Trier Is the Name

By MUSIC CRITIC

history was written last Thursday evening with the organization of a co-operating society of private music teachers chestra, as led by William B. Moeblius, ment. and public school music supervisors at a banquet at the North Shore hotel, Evanston, held for that purpose. The name chosen for the new body is The Music Guild of New Trier Township, and its purpose, as stated at the meeting, is "To give the musicians of the north shore a chance to become acquainted, exchange ideas, and plan definite measures whereby private teachers and supervisors may raise the standards of music education."

The credit for bringing about such a meeting is largely to be given to Mrs. Homer E. Cotton, director of music at New Trier High school, whose earnest efforts at co-operation have already done remarkable good in other lines, as witness the New Trier Township Orchestral association. The replies to a circular sent out by her indicated at once a considerable interest in the project of organization, but the attendance and enthusiasm exhibited at the meeting Thursday the Legion's annual production. necessary that one wonders why it was Henrietta Bush, Mrs. William Heyn, not started sooner; music is rapidly winning a place in school curriculums, and sooner or later a definite standardization must be made if the most efficient progress is to be made. This league of teachers and supervisors is a step in the right direction, and may possibly lead to even greater things than the present organization has planned.

For the present, the general association will hold yearly meetings, while the village groups, under their respective vice presidents will be subject to more frequent calls.

BUILDERS GIVE DANCE

The Boy Builders of New Trier ,an organization sponsored by the Masonic lodges of the township, announce another of their popular dances to be held this evening at the Kenilworth club. Refreshments will be served and the boys promise a great time for the "trippers of the light fantastic toe."

KNOWLEDGE REACHES US THROUGH THE EYES

All through our life, much of our enjoyment and most of our knowledge has been gained by active use of the eyes.

We use our eyes so constantly, and neglect them so shamefully that the slightest defect, if let go, can become a very serious matter affecting our whole lives.

A little attention now may work wonders. Why not let us examine your eyes now?
