LENSES AND PROGRESS

Science has made rapid progress in the past three centuries. Much of that progress has been made possible by the use of instruments with lenses.

New inventions make new demands upon the eyes. Optical science has kept pace with the growth of other sciences. Lenses are now obtainable for every use to which the eyes may be called upon.

All types of ophthalmic lenses are available through our service. After a thorough examination we will advise you as to the kind of lens best suited to your individual needs.
