

Women Golfers Have Matches Planned Throughout Month of September

Review of Golf Events at Five Country Clubs

THE drying leaves and the grass that is slowly drying on the best of fairways hints at the delightful autumn days to come, and at the approaching close of the golf events scheduled for women at the various north shore golf clubs. Until the advent of the first wintry days, one will see golf devotees of both sexes pursuing little white balls over as many holes as their fancy chases, but the schedules arranged by golf committees plan events for the women players through the month of September, with perhaps one or two matches scheduled for early October.

More than ever this year, women have enjoyed the games planned for them on the days set aside by each of the golf clubs, and have followed the programs with ever increasing interest and will undoubtedly turn out with as much enthusiasm during the three or four weeks that remain for their club season.

Once more we receive our weekly report of events past and those to come at the following clubs from Wilmette north to Glencoe.

North Shore Club

Rain Tuesday caused postponement of the match scheduled at the North Shore club, but next week the golfers will play for the Mrs. H. H. Harrison trophy which will be awarded for low net score over 18 holes with full handicap.

During the past week the class championships were played off with the following players entered for the finals: Class B.—Mrs. John Caine defeated Mrs. E. J. White; Class C.—Mrs. C. P. Evans defeated Mrs. E. Tanner. Mrs. J. E. Barron and Mrs. A. C. Collins were to play off the finals Thursday of this week.

Wilmette Golf Club

News of the match this week and next is indefinite, as the coming game is not yet arranged, and Tuesday's event was not scheduled. The women competing for the Golfmoor Land trophy have ended their tournament with the following results: Class A.—Mrs. John McNamara won from Mrs. C. M. Graham with a score of 3 and 2; Class B.—Mrs. N. Arnel defeated Mrs. B. A. Clark; Class C.—Mrs. Tracy Holmes won from Mrs. F. W. Werner; Class D.—Mrs. B. C. Wheeler was paired with Mrs. F. Pethybridge and Mrs. Wheeler won by default.

Indian Hill Club

At Indian Hill the members are playing for the club championship, and will, in all probability, play the final round next Wednesday. Mrs. George Forrest won the low gross score and Mrs. George Massey, the low net, in the play over the "Mystery Nine" September 2.

Sunset Ridge

The matches at Sunset Ridge club Tuesday were class events, as usual. Mrs. Ray Doonan won the 18-hole event and the prize for the fewest number of putts in Class A and B. Mrs. J. Williams Macy won the class C match. Mrs. James P. Gillies was winner of the nine-hole event for Class D, with Mrs. Briggs having the fewest putts for the nine holes. Tuesday, September 15, the event will be a three-club match.

Skokie Golf Club

Because of Labor day, women golfers at Skokie played their ball sweeping stakes match Tuesday of this week, with Mrs. H. C. Phillips holder of the low gross score and Miss Huston and Mrs. Albert Frost holders of the first and second low net. Mrs. Paul Chace won the putting event.

Next Monday will be the occasion of the four ball foursome when Class B players will invite partners from the Class A players. The customary approaching and putting contest will take place at 2 o'clock in the afternoon.

The events at Skokie throughout the current month consist of a double threesome competition with wooden

club, iron club, and putter, Monday September 21, and a one club event the following week with first and second low net to be awarded to players who have not won a morning prize during the season. The final luncheon will follow the morning's game, and elections will be held and awards made.

STUCK STARTERS VEX MOTORISTS

"Don't Forget the Spark," Is Warning

Stuck starters cause much trouble to motorists, according to a bulletin issued by the mechanical first aid department of the Chicago Motor Club. In many cases this is caused by starting the car with spark advanced. In the old days when cars were cranked by hand the motorist remembered the possibility of a broken arm and so he was careful to retard the spark before starting. Today, however, the spark is often forgotten and jammed starter gears are legion. To loosen the spring turn the ignition off, engage high gear and rock the car back and forth several times. Rocking the car from side to side will do no good. The backward motion is the one that frees the drive.

Never tow a car forward with the starter stuck as the forward movement jams it tighter. Worn-out brushes may cause considerable damage to the starter. If too low they will cause an electric arc which will burn and pit the commutator, and in some cases even melt the solder in the armature connections. Sixty percent of the ignition calls handled last year by the mechanical first aid department were the result of loose wires or battery terminals. Loose ammeter connections are most likely to cause motorist trouble. A single wire leads to the recording ammeter on the instrument board and is fastened with a screw terminal. Frequently it works loose. If it comes off entirely there is a break in the electrical system, in which case the car will not start, the horn will not blow, nor will lights burn. If, however, the horn and lights do work the trouble cannot be a broken circuit there and can be traced to the distributor, coil, or possibly corroded battery terminals. The battery terminals may be corroded so badly that sufficient current will not pass to operate the starter or the engine and yet allow enough for the lights and for the horn. The corrosion can be cleaned off with a file and a good connection made.

As a rule, there is more trouble with the ammeter wire getting loose without coming off, than there is if it becomes entirely detached. When it comes loose it may remain in contact for some distance and a bump in the road may jolt it free. The driver may experiment with the car for a while and perhaps the wire will establish contact only to break it later. This process will be repeated until the nut of the terminal is tightened.

Loose battery terminals rank next to loose ammeter wires from a trouble standpoint. Here the horn or light

test will show whether there is a complete break in the circuit, or if like the ammeter wire they may be only loose, so as to make and break the connection. It is possible that they may be filmed over with a blue foam of corrosion.

McKinley Reads List of Westmoreland Qualifiers

Of those to qualify in the preliminary round of the competition for the Angus cup at Westmoreland country club last Saturday, A. A. McKinley led the field with a score of 87-19-68. Others who qualified were T. C. Ripley, J. H. Van Landingham, F. B. Boughton, F. B. Farnsworth, J. C. Reynolds, Charles Stewart, F. C. Stiles, John Medlock, E. K. Nichols, R. M. Moore, T. S. Toohy, E. J. Whitefield, H. T. Boyd, J. D. W. Archer and W. M. Byrd. The competition for this cup is an annual event at Westmoreland.

North Shore Children Win Life Saving Award

Among the north shore young people who passed life saving tests, during August, and have been awarded Red Cross emblems are:

Wilmette — Natalie Yonkers, 911 Sheridan road; Claire Simons, 1233 Forest avenue; Florence Biesemer,

804 Central avenue; Virginia Horwald, 457 Ashland avenue; Winogene Springer, 724 Forest avenue; James Strong, Chestnut street.

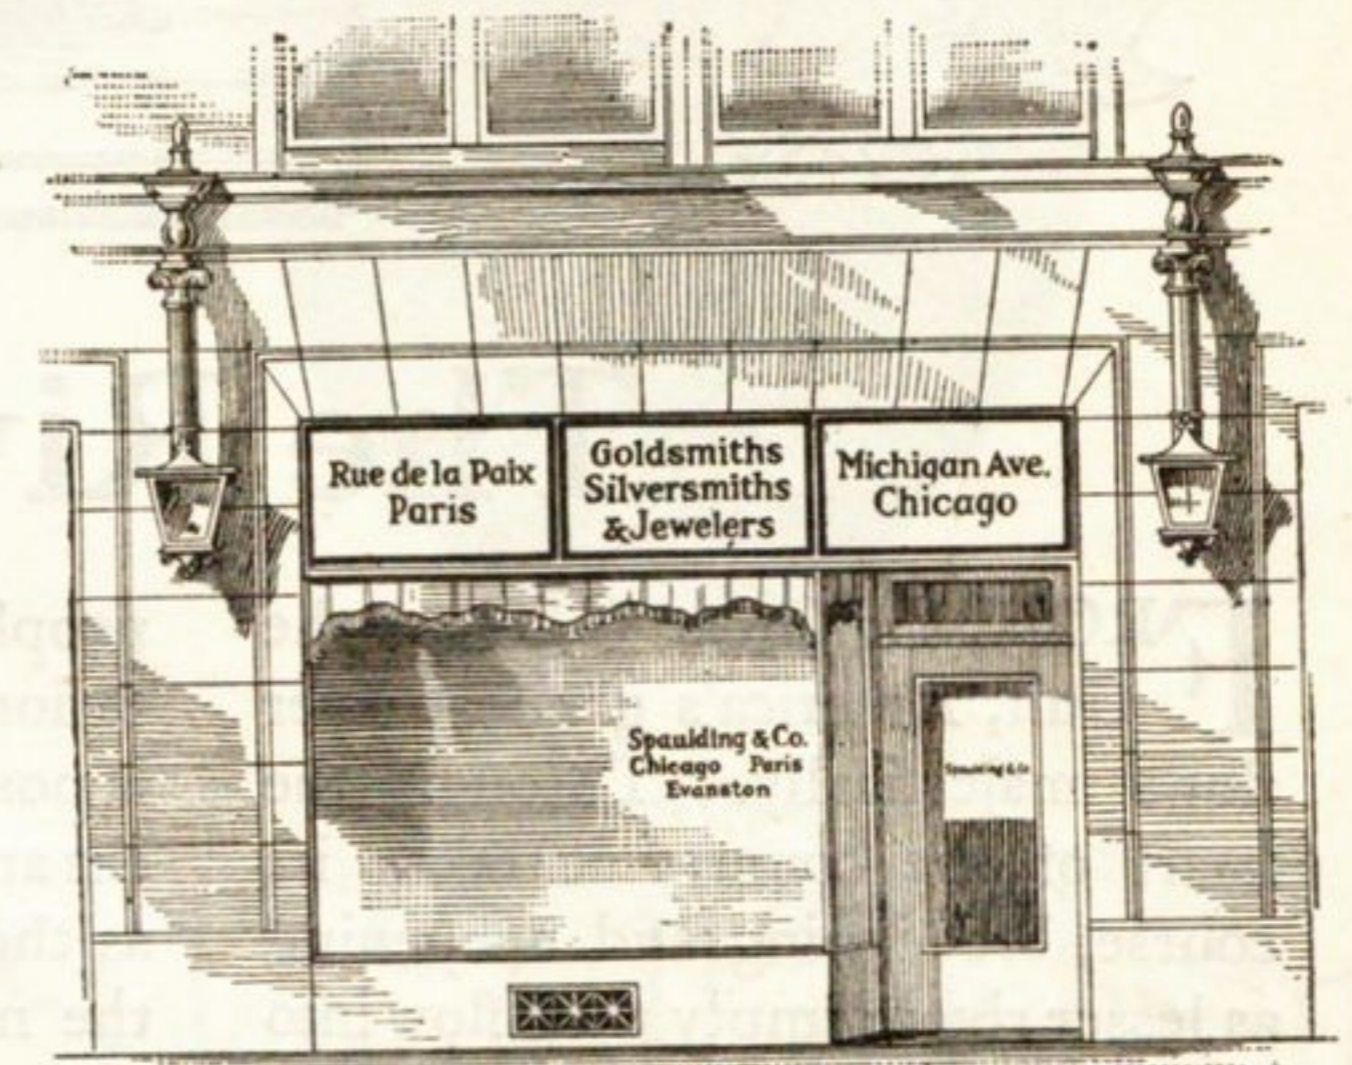

Winnetka—Phoebe Tuells, 38 Abbottsford road; George Massey, 705 Sheridan Park; Charles Markley, 777 Burr avenue.

Kenilworth—Helen Fraser, 645 Abbottsford road.

Glencoe—Violet Ravenscroft, 677 Valley road; Verna Ravenscroft, 677 Valley road; William Best, 873 Grove street.

Norton Hammett Will Manage McMean Alleys

Norton Hammett, well known to hundreds of Wilmette bowlers as manager of the Goodwin Alleys in the Brown building last season, has accepted the managership of McMean's Howard Bowling Alleys at Howard and Paulina streets, Chicago, for the current season. He takes up his new duties next week. The alleys are the official headquarters for numerous Evanston and North Side tournaments.

The Evanston Branch of SPAULDING & Co. Jewelers

For the convenience of our Evanston and North Shore patrons we have established a BRANCH STORE on ORRINGTON AVENUE near CHURCH STREET.

The Evanston Branch provides an attractive shop for the purchase of "The Occasional Gift" which can be selected from a Comprehensive Stock of that class of merchandise which has brought us such an enviable reputation.

It is our desire to institute in Evanston the same attentive interest to our patrons' needs which is a fundamental policy in our Chicago Store.
