**CADILLAC Perfection**

With the utmost sincerity we say to you that the new Cadillac is the finest expression of what a truly modern automobile should be. Literally every individual part in it has been scrutinized with critical care and, where possible, perfected and refined, to be in complete harmony with the Cadillac ideal.

The camshaft driving chain is of a new type, the joints of which require less clearance and which is far less subject to stretch. The fine teeth, distributing the contact over a large surface, insure quietness at all speeds. To eliminate all maintenance, even adjustment, the tension of the camshaft driving chain is automatically maintained and no subsequent adjustments are needed.

This, therefore, reduces by one more the items which ordinarily require service from time to time. There are many other improvements—some of them slight in themselves, but each contributing to make this new Cadillac the wonderful car that it is.
