## IF YOU'LL LEAVE IT TO YOUR WIFE

She will decide in favor of the Humidiator, for it's like adding a piece of fine furniture. That's the appearance the Humidiator gives to a room. But it does even more, it hides from view that common eyesore of every home; the bare ugly radiator. In its place is not only an ornament to your home, but a convenient seat or shelf usable the year around. And when winter comes you will have a health assurance in the soft, moist air provided by the Humidiator.

The Humidiator is an attractive art metal radiator shield with humidifying top easily filled from the end, made in several styles and finishes.
