November 13, 1925

Mr. Fuel User:

With the Anthracite mines closed since September 1st stocks of hard coal are practically gone, but the coal consumer need not be alarmed, as we have an unlimited supply of Chicago Koppers Coke which a great many use in preference to hard coal, also Arkansas Anthracite. This coal is not as hard in texture as the Pennsylvania Anthracite but burns with a nice blue flame and very few ashes. Where being used it is giving perfect satisfaction.

We also have large stocks of high grade Pocahontas and Franklin County, Illinois, coal.

With Cannel Coal and Maple wood for the fireplace there need be no worry. Just call Winnetka 734.

Yours very truly,

Winnetka Coal-Lumber Co.
