

Alvin Culver, Grid Star, Plans to Play With Purple Squad

Alvin S. Culver, 103 Broadway, Wilmette, a veteran football player at the St. Thomas Military academy of St. Paul, Minn., and captain of the eleven last autumn, will enter Northwestern university next September, according to word received by the University this week.

Culver recently finished his most successful grid season in his three years of competition at St. Thomas, leading his outfit to the parochial school championship of the North west in 1925. He plays a tackle position. He was placed at one of the tackle posts on the All-Academy team for St. Paul and Minneapolis this past season.

This husky gridman, who stands six feet two inches in his stocking feet and tips the beam at 205 pounds, is a versatile athlete and is unusually speedy for a man of his size. He captained the water polo team, and received letters in this sport as well as on the track.

Culver expects to graduate from St. Thomas next June. He will be only 18 years old when he enters Northwestern. He is a good student as well as an athlete.

A New Method Has Made Good

PRESENT cost levels are much higher than those of ten years ago, so that each additional telephone installed now increases the average investment per telephone. To maintain the service the company's revenues must keep pace with this condition.

FOUR years ago the Bell System introduced "station-to-station" long distance service.

The service has "made good." It is used thousands of times daily where it is not necessary for the caller to speak to a particular person or where the person wanted is likely to be within immediate reach at the called telephone.

The service is especially suitable for personal or social calls to relatives or friends.

Rates for daytime station-to-station calls are about 20 per cent lower than for person-to-person calls. Evening and night rates are still lower. The rate is charged when the distant telephone (or private branch exchange) is answered.
