Appropriate \$20,000 for Water Plant Facilities

The appropriation of \$20,000 from the water fund for the purpose of constructing additional intake facilities at the municipal pumping station was voted at the meeting of the Village council held last Tuesday evening. The additional intake facilities are needed in order to handle the heavy demand for water in possible dry weather during the coming season, and are made particularly necessary by the extremely low level of the lake, it was said by Village Manager H. L. Woolhiser. The lake level is lower than ever before in the history of government records, and that condition reduces the capacity of the present intake. It is planned to have the improvement installed and ready for use by June 1, it was said.
