Serving 100,000 Meals a Year on Dining Cars

HALF a million candy mints for North Shore Line patrons. That is what we distributed on dining cars last year. These complimentary mints—six in a package—have become an established feature of our dining car service.

Dining cars on the North Shore Line were introduced in 1917. Today we operate dining cars on twelve trains daily—six trains in each direction. With the delivery of additional cars in June, our investment in dining cars alone will be \$330,000.

Maintaining a dining car service of North Shore Line standard is a costly proposition. Chinaware, table linen and quadruple-plate silver for a single car cost \$1,000. Our monthly laundry bill alone is \$900.

Foods are selected with as much care as you would exercise for your own table. We buy the best creamery butter—milk and cream—fruits, vegetables, meats and other foods. Fresh eggs come to us daily from the farm.

North Shore Line steaks have become justly famous. Every steak we buy is a specified weight and a specified cut; those showing any variation are rejected. It is an interesting fact that from one-third to one-half of all patrons order these choice steaks.

Our coffee—a special blend—brings us daily compliments. 106,000 cups were served last year. You are welcome to a second or third cup—or as many extra cups as you want—without charge. Each patron at breakfast is greeted with a complimentary demi tasse.

Back of our dining car service is a commissary employing eight people. Two motor trucks are kept busy in its exclusive service. Foods and supplies are bought by the commissary. All pies and pastry are baked in the commissary kitchen.

Nearly 100,000 people are fed during the course of a year on North Shore Line dining cars.
