

LET THE PUP BE YOUR FURNACEMAN

ABSOLUTE freedom from all heating cares will be yours when the gas company heats your home. 70° by day; 60° at night—or any other combination of day and night temperature you prefer.

—and with no more care or attention to the heating plant than a pup can give; not even a glance for days and weeks at a time!

Let our house heating department give you an outline of present day gas heating facts. Just telephone Winnetka 80.
