

## Trees Are a Priceless Possession

*Don't let them perish through neglect*

**Y**OUR TREES can best recover from the effects of the rigors of winter only when aided by intelligent care. Pruning and spraying are necessities—the trees cannot correct these needs themselves.

The care of your trees calls for experienced attention. Our tree experts are equipped with the necessary skill and courage to reach the topmost branches. Our motor sprayer is the largest of its kind on the North Shore.

It costs you nothing for an inspection of your shade trees. We'll gladly give you complete details of our expert tree service—trimming, spraying, surgery, bolting, cavity work, etc. Save your trees now!

*Write, telephone or call for new illustrated booklet, "TREES."*
