

To Very Little Miss North Shore:

When you're out walking or riding with mother, bring her in to show her the cunning things we have for you and brother.

There are adorable frocks from Porto Rico, hand made, every stitch; colorful prints; chambrays (brother and sister suits); printed silks and crepes. These come in sizes to 10. Rompers and creepers for small brother and sister come in sizes 1 and 2.

Mother will delight in the beauty of our inexpensive, machine-made sweaters as well as the exquisite hand-made ones for tots from 1 to 5.

And Miss Thal has grown-ups' clothes, too.

Winnetka

HOLD HEALTH WEEK

Winnetka to Join With Other Communities of State in Program Next Week

Winnetka is expected to join with other communities in Illinois in the active observance of Health Week, scheduled for April 25-May 1.

The program observed generally throughout the state is essentially as follows:

- Sunday, April 25: Health Sunday**—Health sermons and talks should be given before congregations and other gatherings. The promotion of clean healthful living manifestly conforms intimately with religious discipline.
- Monday, April 26: Physical Examination Day**—Public health authorities and eminent physicians are coming rapidly to regard periodic examinations of individuals as the most important means, under present day conditions, for improving personal and community health. Adults should be encouraged on this day to arrange for a complete examination by the physician. Civic clubs offer a splendid means of contact to this end.
- Tuesday, April 27: Diphtheria Prevention Day**—Decline in diphtheria prevalence has been phenomenal during the last two years. Cases have dropped from 10,000 to 5,000 annually and deaths from 1,000 to 500. This encouragement should stimulate especial effort toward a wider use of toxin-antitoxin for immunizing susceptible children.
- Wednesday, April 28: Smallpox Vaccination Day**—Epidemics of smallpox are expensive to health and to the pocket book. Surveys should be made in the schools on this day to discover who has not been vaccinated and to distribute literature to them.
- Thursday, April 29: Safe Milk and Safe Water Day**—Occasion should be taken to inquire into the character of municipal milk and water

supplies and the measures taken to prevent contamination. Private water supplies should be investigated. Last year typhoid fever was 45% more prevalent than in 1924, largely due to polluted water supplies.

6. Friday, April 30: School Health Day—Programs for instructing school children and their parents in the importance of a balanced diet should be arranged. Health playlets and songs and talks by doctors, nurses or dieticians make such programs both instructive and entertaining.

7. Saturday, May 1: Child Health Day—May First will be observed as Child Health Day throughout the U. S. The President and Secretary Hoover have endorsed it as such. This splendid opportunity for focusing community attention on child health should not be lost.

BIGGER CLINIC FOR CHICAGO

When the medical and dental clinics of Northwestern university are located in the Ward Medical-Dental center on the McKinlock Memorial campus in Chicago, the clinical service for Chicago will be considerably augmented. The new center will have space and equipment which is now lacking and which will mean the easy and successful treatment of thousands of cases, which cannot be handled in the most satisfactory fashion in present quarters. Probably no public clinic in the world will be better able to take care of needy cases than Northwestern under the new auspices. All of this was made possible by the munificence of Mrs. Montgomery Ward of Chicago.

Mr. and Mrs. Charles W. Lobdell are giving up their apartment in Chicago and are moving to Winnetka the first of May where they have taken a house for a year.

Mrs. Cuthbert Adams of Winnetka with her daughter, Katherine, who is a student at Bryn Mawr, will sail June 5, to pass the summer abroad.

AT THE LOWEST PRICES

COAL AND COKE

Order now! Your coal bin is no doubt practically empty. You have been waiting for the lower prices on coal and coke before "loading up." The prices are now the lowest, and its time for you to order. Buy at these prices.
