

To Realize Your  
**BETTER HOME**

*"To aim at connoisseurship when you do not know a good table or chair from a bad one is to attempt flying before you can walk. So, I think, professors of art at Oxford or Cambridge should be chosen, not so much for their knowledge of Greek Sculpture, as for their success in furnishing their own houses."—A. Clutton Brock.*

For more than three years we have been concentrating on better furnished homes. We have gone into the markets and selected furniture, which would grace any home on the North Shore.

This unusual stock offered for your choice is marked at prices which combined with our *extension payment accommodation* make it possible for every family to make a success of furnishing its home.

With such desire to be of service to our customers, little wonder this store has grown *eleven times as large* as it was three years ago.
