REO

The Greatest Success In Years of Succeeding

Greater mechanical dependability and advanced physical beauty have been skilfully combined in the new Reo motor cars.

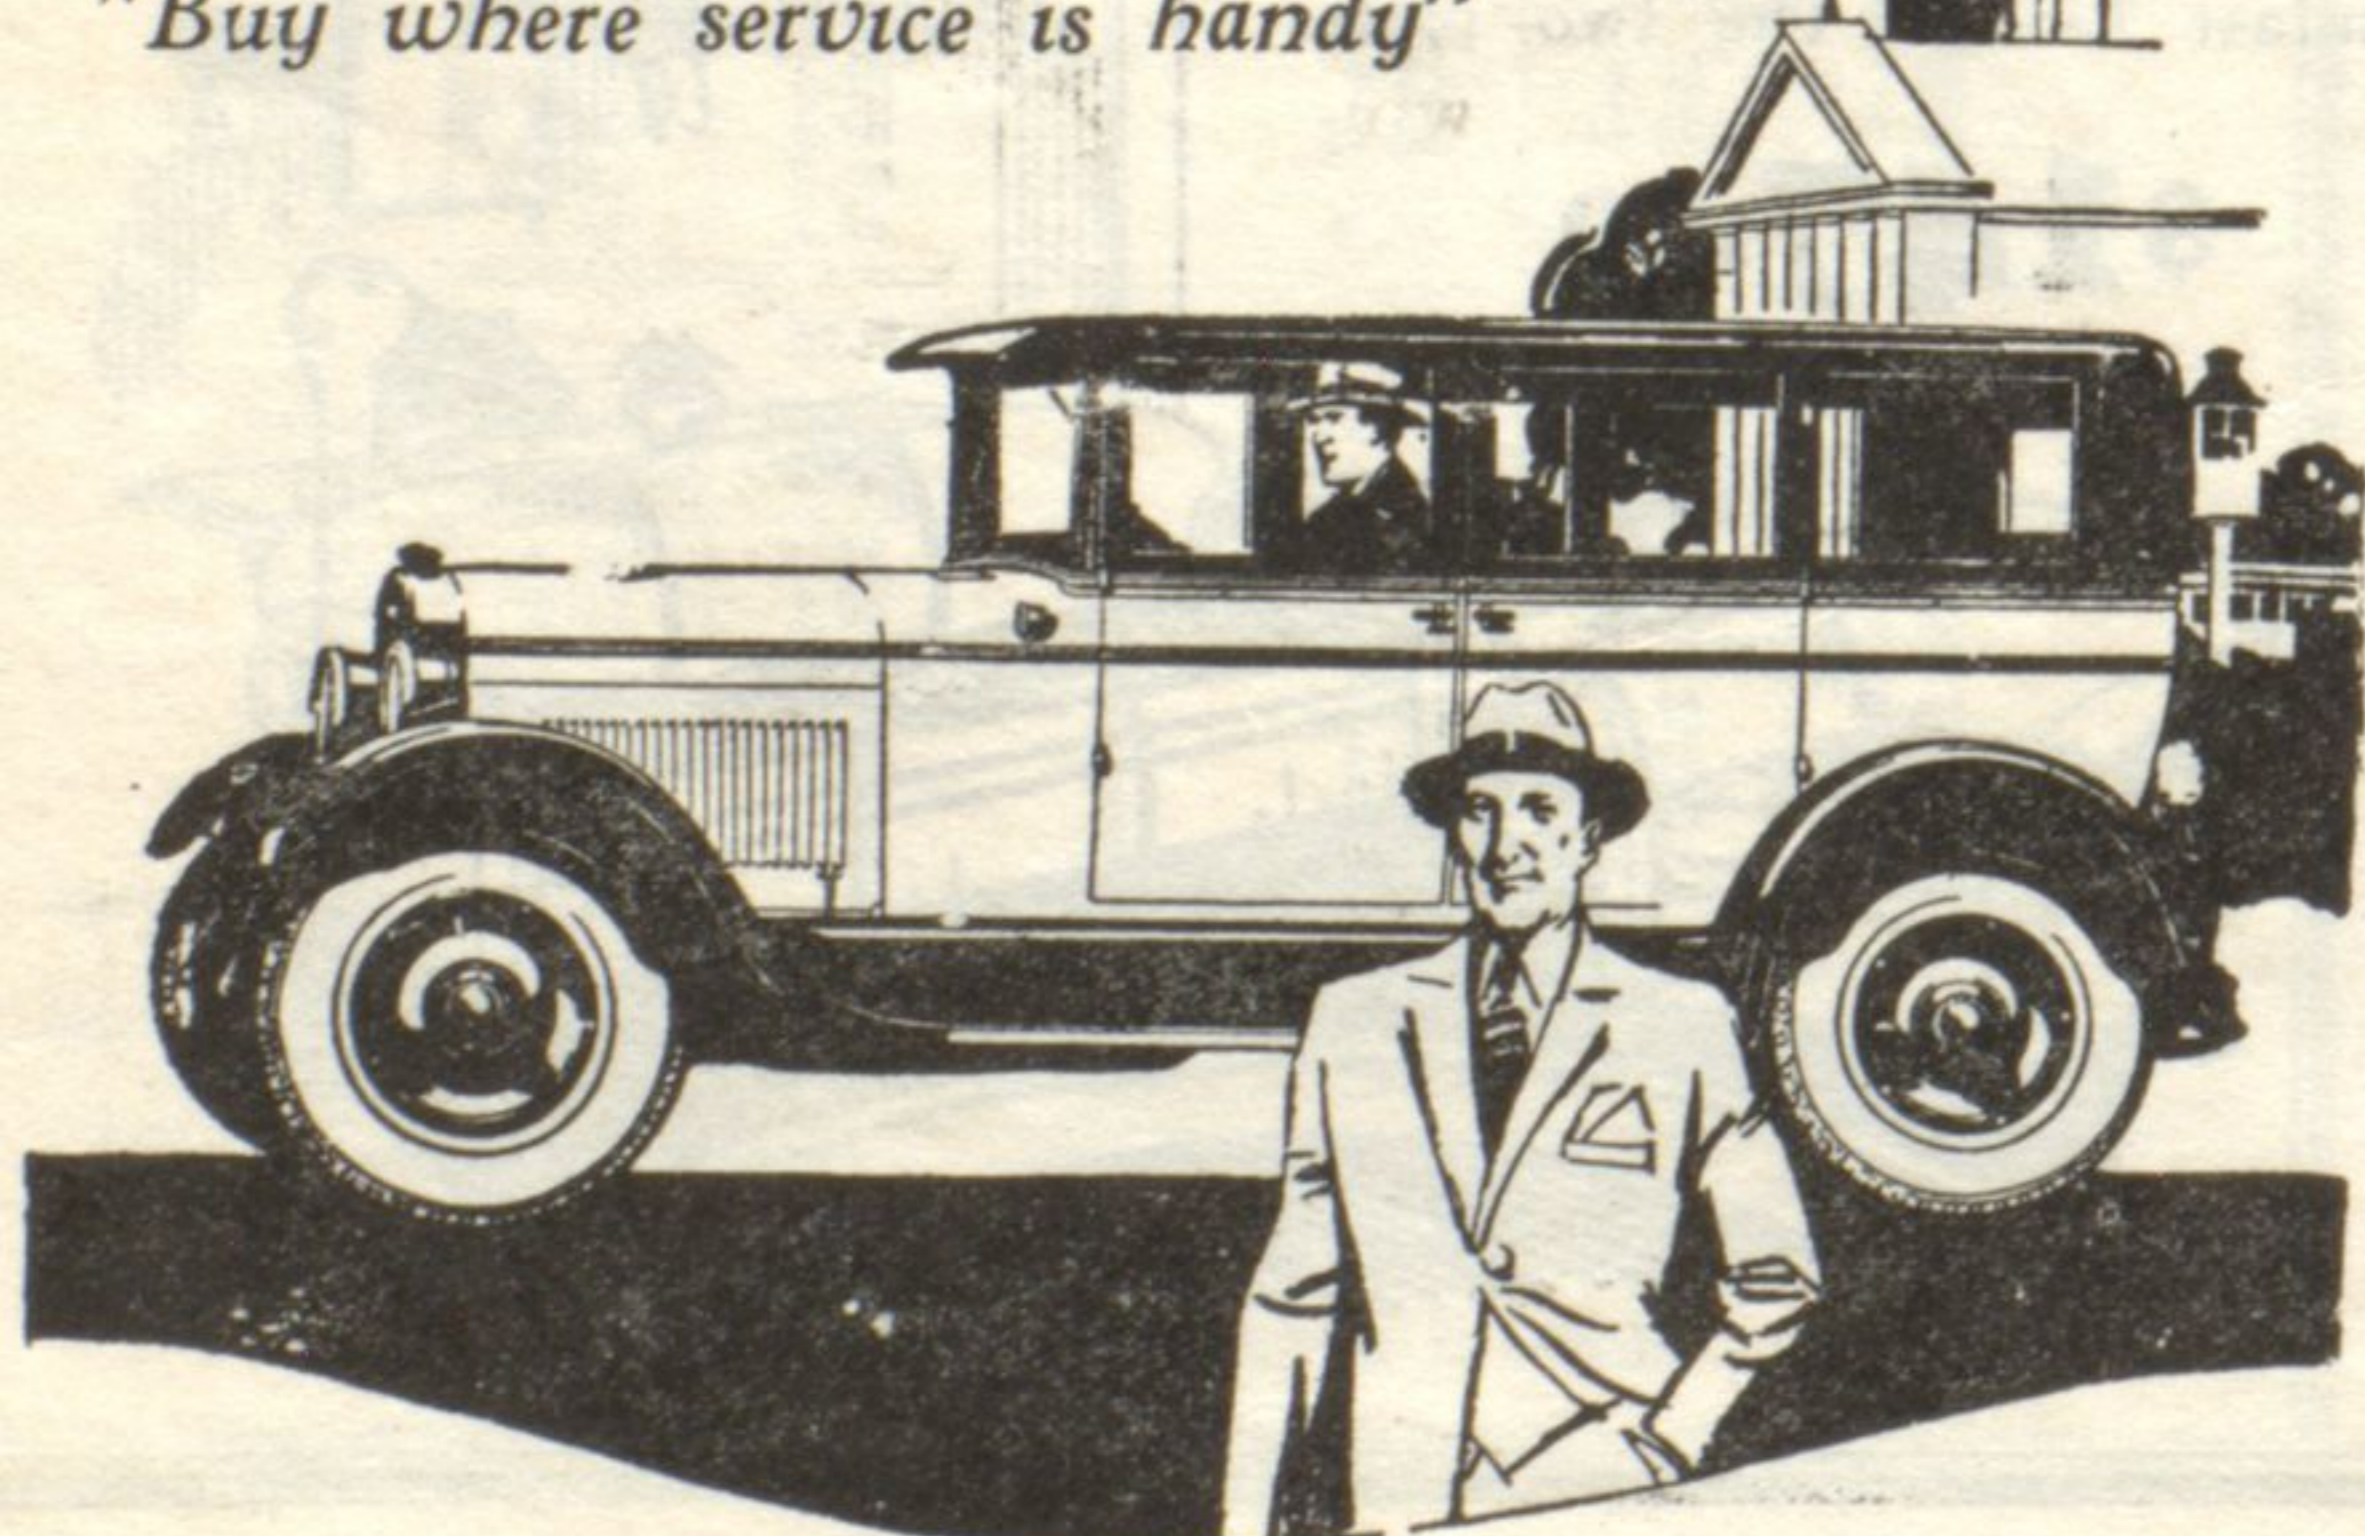

Such superiorities as split-second braking, sturdy body construction, freedom from repairs, longevity and abundant power are clothed in a new attractiveness of line and color which leave nothing to be desired.

Add to this the part played by Reo's financial stability in producing cars of this character at the cost of ordinary automobiles and you have the reason for Reo popularity.

"Buy where service is handy"

Purple Golfers Prepare to Cop Season's Honors

Although the Purple golf team has had very little outdoor practice, due to the inclement weather, indoor practice in the Patten gym net has helped remedy the situation and the western conference champs have strong hopes of repeating this season.

The schedule arranged for the golf team follows: May 1, Northwestern at Illinois; May 7, Purdue at Northwestern; May 13, Wisconsin at Northwestern; May 14, Drake at Northwestern; May 20, Michigan at Northwestern; May 24, Northwestern at Iowa.

Red Cross Aids Many Disabled Service Men

Although seven years have passed since the men who served in the World war were demobilized, thousands of them are still in hospitals or partially disabled. To these men and their families the War Service department of the American Red Cross still renders aid. During the past year, more than 25,000 requests for service have come to the Chicago chapter.

The service given includes assisting the families of men who are in the veterans' hospitals, in establishing death claims and enabling dependents to carry on until a regular allowance from the government comes in, in procuring evidence for men who are admitted to the government hospitals for mental cases and, at the request of the Veterans' Bureau, supervising the welfare of orphaned children who are its wards.

There are many men constantly passing through Chicago on their way to or from the hospitals. Red Cross workers meet these sick veterans, transfer them, using litters, wheel chairs and ambulances, if necessary, provide temporary shelter and food. Other men recently discharged from hospitals are aided in securing work or in returning to their homes.

OBSERVE "BABY WEEK"

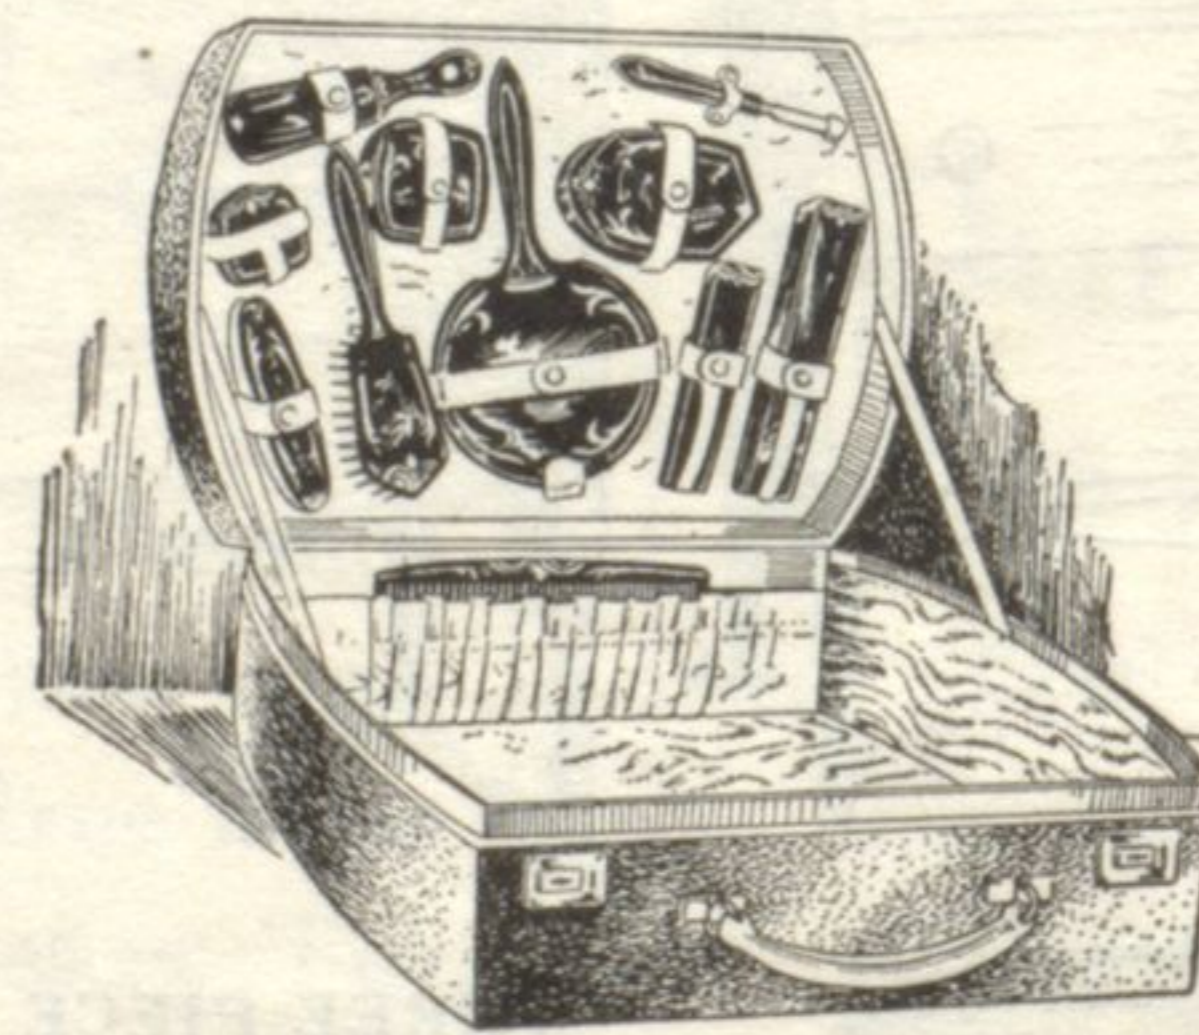

Infant Welfare Society Sets Sunday, May 2, as Time to Tell Parents of Work

"Baby Day" is to be observed on Sunday, May 2, under the auspices of the Infant Welfare society of Chicago. The purpose of "Baby Day" is to concentrate the attention of the fathers and mothers on the welfare of Chicago's babies and to tell them how the infant mortality rate can be cut in two. The infant welfare stations receive generous support from all the north shore villages.

The Infant Welfare Society and the Chicago Health department are co-operating in making Chicago and environs safer for babies. Last year the infant welfare stations conducted by the society, together with those conducted by the Health Department, cared for more than 25,000 babies under two years of age. These babies had more than three times the chance for life and health that babies in general in Chicago enjoy. The principal reason for this is that the Infant Welfare babies receive continuous medical supervision and breast-feeding is urged and promoted. Babies are brought to an Infant Welfare station regularly where they are examined by a doctor and the mothers told what to do to keep them well. Then every baby is visited in its home periodically by a nurse who further instructs the mothers concerning proper feeding, bathing, dress, sanitation, etc.

As one means of letting fathers and mothers in general know how to keep their babies well, the milk companies of Chicago have generously made provision to print and distribute 500,000 cards on the day before "Baby Day" on one side of which will be instructions, "How to Keep the Well Baby Well," on the other side of which will be a statement from Dr. Herman N. Bundesen, Chicago commissioner of health.

FOR WEDDING GIFTS
