The largest glass-sand deposits in the world are located near Ottawa, Ill.

**Motor Club Gives Advice
on How to Wash Autos**

"For the first four weeks after a new varnish job has been applied to a car, no soap should be used," says a bulletin issued by the mechanical first aid department of the Chicago Motor club. "The car should be showered with cold water, and a soft sponge used to loosen the dirt. Care must be taken not to drag the chamois over the varnish in drying. Subsequently only the best soft soap must touch the finish, and that soap must be entirely dissolved. This can be done quickly through a fine mesh bag. If the finish on the car is dull and lifeless it should be washed with suds and rinsed with clear, cold water, and allowed to dry without the use of chamois, which would dull the finish; then a fresh tone should be applied to the old varnish, a pleasing brightness being the result."

START VAUDEVILLE

The New Evanston theatre plans to have vaudeville every Thursday, Friday and Saturday. The venture is being started for the first time this week, and it has never been done before north of Howard avenue. The vaudeville will be high class as the players in it have been starring on vaudeville circuits previously.

The headliners for the bill this week on Thursday, Friday and Saturday, are: Bobby ("Uke") Henshaw, who has been a headliner on the Loewe circuit, New York, in a sketch called "The Merry Mimic," Julia Edwards and company in a comedy aerial act, "Sun in the Air," and Frances Lamonte and Seeman Jemery in "Songs, Studies, and Dance."

The picture which is being shown with these acts is "Brown of Harvard," starring William Haines, Mary Brown, and Jack Pickford.
