

FLEXIBLE POWER
with a flashing response

Take the wheel and discover for yourself the amazing flexibility and unlimited power of the famous Wills Sainte Claire engine! Its silence at high speeds or idling at the curb! Its effortless fleetness! For one thing, Wills Sainte Claire pioneered in introducing to America the overhead camshaft—an engineering principle almost universally used in the finest aviation and motor car engines of Europe.

As this construction eliminates valve lifters, pushrods, rocker arms and other noise-making, trouble-making parts, it has much to do with the remarkable silence, economy and un-failing efficiency of Wills Sainte Claire performance. Remember, too, that thanks to the greatest year in Wills Sainte Claire history, Wills Sainte Claire prices are now lowest in the fine car group.

GOOD FOR YEARS AND YEARS AND YEARS

L. W. Rusness to Assist Coaching at Northwestern

L. W. Rusness, of Fargo, N. D., has been an assistant freshman football coach at Northwestern university, it was announced yesterday by Director of Athletics Kenneth L. "Tug" Wilson.

Rusness, whose first connection with the Purple came with his application for admission to the law school, which he will enter this fall, comes from the University of North Dakota, where he was in charge of the freshmen teams. Before that he was in complete charge of athletics at the Fargo high school. He enjoyed unusual success there.

Besides winning numerous state titles in football, basketball and track, he is given the first credit for producing such stars as Waldo Fisher and Bobby Rusch, who in their sophomore years at Northwestern last year were the bright lights of the frosh graduates. Fisher was selected all-conference basketball center by a majority of the sports writers.

Besides assisting Coach Maury Kent in the tutoring of the frosh gridders, Rusness will assist in the Northwestern professional school intramural program.

Mrs. J. H. Lindeman, 1089 Spruce street, entertained Wednesday at the weekly bridge luncheon at the Sunset Ridge Golf club in honor of Mrs. C. A. Frary of Dayton, Ohio, who is the guest of Mrs. John T. Dix, 236 Oxford road, Kenilworth.

Dick Jenkins, son of Mr. and Mrs. William F. Jenkins of 1047 Elm street, is spending the summer visiting friends in Cedar Rapids, Iowa. Canoeing is one of the sports which he is enjoying.

KENILWORTH BEACH IS ALL SHIP-SHAPE NOW

Boat House, Diving Raft, and Beach Ready for Summer Swimming Season

Activities at the Kenilworth beach are now in full sway and everything is in readiness for the summer swimming season. The daily temperature records, which are taken and posted on the boat house, indicate that the water is warming up which should be good news to the swimmers.

The diving raft is in the water. All of the beach is clean and ship-shape, excepting that small part around the new water works where construction work is going on and this will be cared for as soon as the work is completed. Due to this construction work the stairway and walk to the boat house are not in the best of condition but every effort is being made to speedily remedy this. In the meantime, caution should be taken in going to and from the boat house.

The beach umbrellas and benches will be on the beach each day and this year the beach on the south side of the pier has been set aside for the games of the older boys and the beach on the north side of the pier has been reserved for swimming and the place where the little kiddies may play in safety and not be hampered by the older ones.

Use Utmost Care

A safety rope will be strung in the water on the north side of the pier and within the safety rope a special place will be roped off for the kiddies. The place for the kiddies to swim will be examined each day to make sure that the shifting sands have not formed any deep holes or pockets.

A life guard will be on duty from 9 o'clock in the morning to 8:30 or 9 o'clock in the evening, depending upon the weather, and these should be considered the open hours of the beach. A conspicuous sign will be posted when the life guard is "off duty" and it seems advisable that people remain out of the water when this sign is up. The life guard has been instructed to see that all children unaccompanied by parents have left the beach before closing for the evening.

The life boat which is on the beach is reserved exclusively for the use of the life guard and should not be used by the swimmers, which has often occurred in the past.

No one is to be allowed on the raft who cannot swim and no dogs should be brought to the beach unless under leash, it is announced. There are still a few stalls for boats or canoes in the boat house which can be leased for the summer by applying to the beach ward.
