Board Considers Sewer Project on Willow Road

The Board of Local Improvements held an informal hearing at the Village council chamber Tuesday evening to consider the construction of a storm water sewer system south of Willow road and west of the railroad. There was a large number of property owners present, some of whom expressed themselves in favor of the improvement, which they felt is necessary because of water at times in the basements of their residences caused by the backing up of the sanitary sewers.

Quite a number expressed opposition to the improvements, owing to the expense of the same.

F. A. Windes, village engineer, explained that the cost of the proposed improvement would be from \$2.50 to \$2.75 per front foot.
