Demonstrate How Toys Can Be Made Like New

In nearly every home in Winnetka there are no doubt small pieces of furniture, children's toys, etc., which have been relegated to the discard, all because of the usual messy and tedious method of refinishing them with a coat of paint.

Devoe Lacquer will change all this, it is said, and Saturday of this week is Devoe Lacquer day in Winnetka, when a demonstration will be conducted throughout the day, at the Eckart Hardware company's store, 735 Elm street. Everyone is invited to call and witness the work of a Devoe Lacquer representative, and to bring small pieces of furniture, and children's toys which need a bright coat of paint to make them look like new.

HOME FROM FLORIDA

Mrs. D. W. Poff, 739 Walden road, and her daughter, Ruth, returned Tuesday from a year's stay in Florida. Dr. and Mrs. Poff and their daughter left in October, 1925, and spent several weeks on the east coast before buying a home in Kissimee. Dr. Poff returned to Winnetka in March of this year. Before coming back Mrs. Poff sold the attractive tea room which she had taken over in May, and is back in Winnetka to stay.

Seventy-five per cent of the machinery used in the entire fruit and vegetable canning industry in the United States is manufactured in Hoopston, Illinois.

HEAR ZOO ARCHITECT

Edwin Clark Tells Country Day School About European Zoos and New Chicago Zoo at Riverside

"Zooing Through Europe and America" is the subject of an illustrated talk given Tuesday at the morning exercises at the North Shore Country Day school by Edwin Clark, one of the parents of the school. Mr. Clark is architect for the new Chicago zoo to be built at Riverside, and spent the past summer visiting zoos in European cities collecting ideas for the one being planned for Chicago, which is to be the largest in the world. The Forest Preserve has given 196 acres of land for this project, Mr. Clark explained.

He is designing the zoo as far as possible to permit the animals to live in their natural haunts. Most of the enclosures will be in the open air, without bars, made up on three sides by a cliff and with a ditch on the fourth. He showed pictures of European zoos constructed in this manner.

The plan, it was explained, will embrace a large farm on which to raise vegetables for the animals, and there will also be a large feeding equipment, and a hospital in which to place the animals in quarantine when they first arrive.

He showed the school moving pictures which he had taken in the zoos in London, Rome, Rotterdam, and St. Louis.

For Better Home Made Candies

The Store of Home Made Candies

Chocolate and Maple Fudge
The kind you used to make at home.

Caramels of Many Kinds
Made with pure rich cream.

Caramel Mallows
(Scotch Kisses)
