

BUILDERS FINISH HOME WITH SPANISH FEATURES

E. T. Leonard Company Builds Seven Room Home Among Oak Trees on Foxdale Avenue

The E. T. Leonard company of 556 Center street, Winnetka, builders of homes that are different, are just now completing one of the prettiest of the numerous residences which they have constructed on the north shore during the past season.

It is located at 811 Foxdale avenue, on the east side of the street and just north of Eldorado street, on a lot 50 by 150 feet on which are a number of good sized oak trees, a splendid setting for featuring this seven-room Spanish mission house.

The exterior is of rough plaster finish. A bright tile roof and a flagstone terrace with mission rail complete the mission style on which the design is founded.

The large vestibule is floored with a bright tile of wood fibre, giving at the same time the effect required in the architectural scheme and assuring greater comfort than stone or real tile. The same style of flooring is also used in the sun room.

Living Room Offers Features

A large living room, the floor of which is one step lower than the entrance hall, is featured with a mission fireplace at one end of the room, with book cases on either side of the mantle, and a mission grill opening between the living room and dining room. Beamed ceiling and side lights throwing softened rays from special bulbs encased in scenic sconces complete the attractive designing of this section of the house.

A quaint breakfast nook, frigidaire, ventilating fan and a lay out which has in mind convenience and comfort at every turn, feature the kitchen. The dining room is spacious and exceedingly well lighted.

There are four bed rooms on the second floor, with sand finished walls, in colors. The minimum of trim is used throughout the house, all in dark mission stain.

Tubs Recessed in Arches

There is a toilet and lavatory on the first floor and two bathrooms on the second, in both of which tile is used in the floor and wall finish. The tubs are in arched recesses, with a shower over each.

The medicine cabinets are something new, comprising two compartments, with tripple mirror doors.

The lighting fixtures throughout the house are of Spanish copper, and in an entirely new design. They were installed by the Kordick Electric company of Winnetka.

The North Shore Gas company is installing the laundry equipment. The building, including a garage, has been put on the market, the E. T. Leonard company announces.

Fire Chief Gives Advice on Holiday Illumination

G. M. Houren, chief of the Winnetka fire department, wishes again to remind residents of Winnetka, at the approaching of Christmas holidays, to pursue the safer plan of making arrangements for electrical illumination of Christmas trees, instead of using the lighted candles. "The lighted candles are a hazard," Chief Houren says, and, "according to the village ordinance are not permitted in public gatherings. Electric candles will look just as well and are safer," he said.

Your Roof!

May need some repairs. Slate, Tile and Sheet Metal.

Your Furnace!

Did you find it in good condition for the first fire?

Distance!

No matter how wonderful the entertainment from nearby stations—regardless of how varied and satisfying the programs may be—there is within us all a frequent desire to follow our imaginations and cut through out into the night for the music of entertainers and orchestras far away.

To be able to accomplish this approaches realization of the delights of the fabled magic carpet. It can be done by the owner of a receiver such as Kellogg model 507 or 508. Built into these sets are sensitivity and selectivity possible only from long years of experience, and laboratory facilities available to but a very few.

Licensed under application for letters patent of Radio Frequency Laboratories, Inc. (R.F.L.)

KELLOGG Radio

These Kellogg receivers include three stages of radio frequency, thoroughly shielded and carefully balanced. Due to the exclusive Kellogg system, Inductive Tuning, the long sought feature of equal sensitivity at all wave lengths, without auxiliary controls, is accomplished.

Whether from far or near, the programs received by Model 508, with its wonderful new built-in speaker will roll out with a depth and realism never before attained in Radio, and equalled only by the latest phonographs.

Let us demonstrate these models for you—that is the only way by which you can be completely convinced that Kellogg Radio includes everything for which you have wished in a radio receiver. Table Model 507, \$215. Console Model 508, \$345.
