**Buying for Men Easy  
This Xmas, Says Hub**

George Lytton, vice-president of The Hub—Henry C. Lytton and Sons—has just completed his final round of inspection of the new Evanston shop's readiness for the Christmas season. "It looks to me as though not one single thing that any man or young man would like to receive as a gift from his wife, mother, sweetheart, sister or aunt has been overlooked in our preparation. For months we've been studying the tastes of our north shore clientele with the one objective of rounding out our first year in Evanston with 100 per cent service to women choosing gifts for men. Each year our buyers go abroad visiting the leading markets of the world in their search for unusual Christmas merchandise, and this year they received specific instruments to out do themselves in preparing our Evanston Shop."

**LEAGUE STUDY STARTS**

The Winnetka League of Women Voters has organized a study class in preparation for active legislative work during the coming session of the Illinois legislature. The opening meeting was held Monday morning in the Camp Fire room of Community House. Following the lectures a simple luncheon was served. Those interested in joining the group may phone Mrs. John VanderVries at Winnetka 1968, it is announced.

Mrs. Herbert R. Hedman of 115 Fuller lane, entertained twenty friends at luncheon and bridge, Monday, November 22, in her home.

Mr. and Mrs. Ove Jensen, 943 Spruce street, have sold their home and have moved to Evanston for the winter. Mr. and Mrs. E. F. Hartshorne are occupying the Jensen home.

**Head of City Club  
Tells of Need for  
Study of Civics**

"Civics in the City of Chicago," or more concisely, the scope and range of interest of the Woman's City club of Chicago, in the civics of the city, was the subject of an address given by Mrs. B. F. Langworthy, president of the club, before the students of the National Kindergarten and Elementary college last Thursday afternoon.

Mrs. Langworthy drew a clever comparison between the woman who saved and scrimped for years to buy a piano, which made a fine ornament for the parlor but which neither she nor her children were ever able to play—and the women of today who have fought and suffered to obtain the vote, are very proud of having it, but have no idea of how to use it.

"We often find ourselves beating our heads against a stone wall of ignorance on the part of women in regard to civics," said Mrs. Langworthy, "and the club is working to try to make women see the necessity for their own education along these lines."

Mrs. Langworthy outlined the work of several of the thirty-two branches or committees of the club, including those on Child Welfare, Public Health, Clean Air, Courts, Foods and Markets, Housing and Zoning, Education, Legislature, explaining briefly the reason for the formation of each committee, and the way in which it functions.

The address was most interesting and gave the young women an idea not only of the need, but of the tremendous possibilities which lie before an organization of this kind.

Mr. and Mrs. Rush Butler, Jr., of Chicago, announce the birth of a daughter, Blair, Sunday, November 21, at the Evanston hospital.

**A DOUBLE INVESTMENT—  
A GARAGE**

When you build a garage you not only protect your car but you add to the value of your home. Most people in selling a home point to the garage as one of the necessary conveniences of the present day home.

A garage will cost you little to build and will more than pay for itself by affording protection for your car and by adding value to your home. We have the quality material necessary for construction—as well as plans.
