

## *A Service Call* will insure performance

There is no variation, from year to year, in the quality of Chicago Solvay Coke which for twenty-one years has been Chicago's dependable fuel for home heating. Any change in the results obtained from this standard fuel comes from some changed condition in the heating plant or some variation in your method of firing.

No matter how satisfactory your results may be, it is worth while to insure that they are the best possible. Have a Service Man call at your convenience to look over your heating plant—hot water boiler, hot air furnace or stove—and to give you the benefit of his experience in firing the equipment you have.

Chicago Solvay Coke is not only clean, smokeless and much cheaper than hard coal but it should prove the most convenient and comfortable fuel you ever burned. And it will prove so, if you will have a Service Man check up on its performance. Call your dealer right now. Colder weather will come.
