

Yesterday's Heating Won't do Today

Heating of yesterday and today

Change to Automatic **GAS** Heating

Why should we, in this age of gas and electricity and with all other modern conveniences, travel by "horse and buggy" just because "That's the way people used to travel." WE DON'T but still there are a few of us who have not stopped to see that same change in their methods of *heating*, and will continue to spend time and energy in caring for *yesterday's method of heating*.

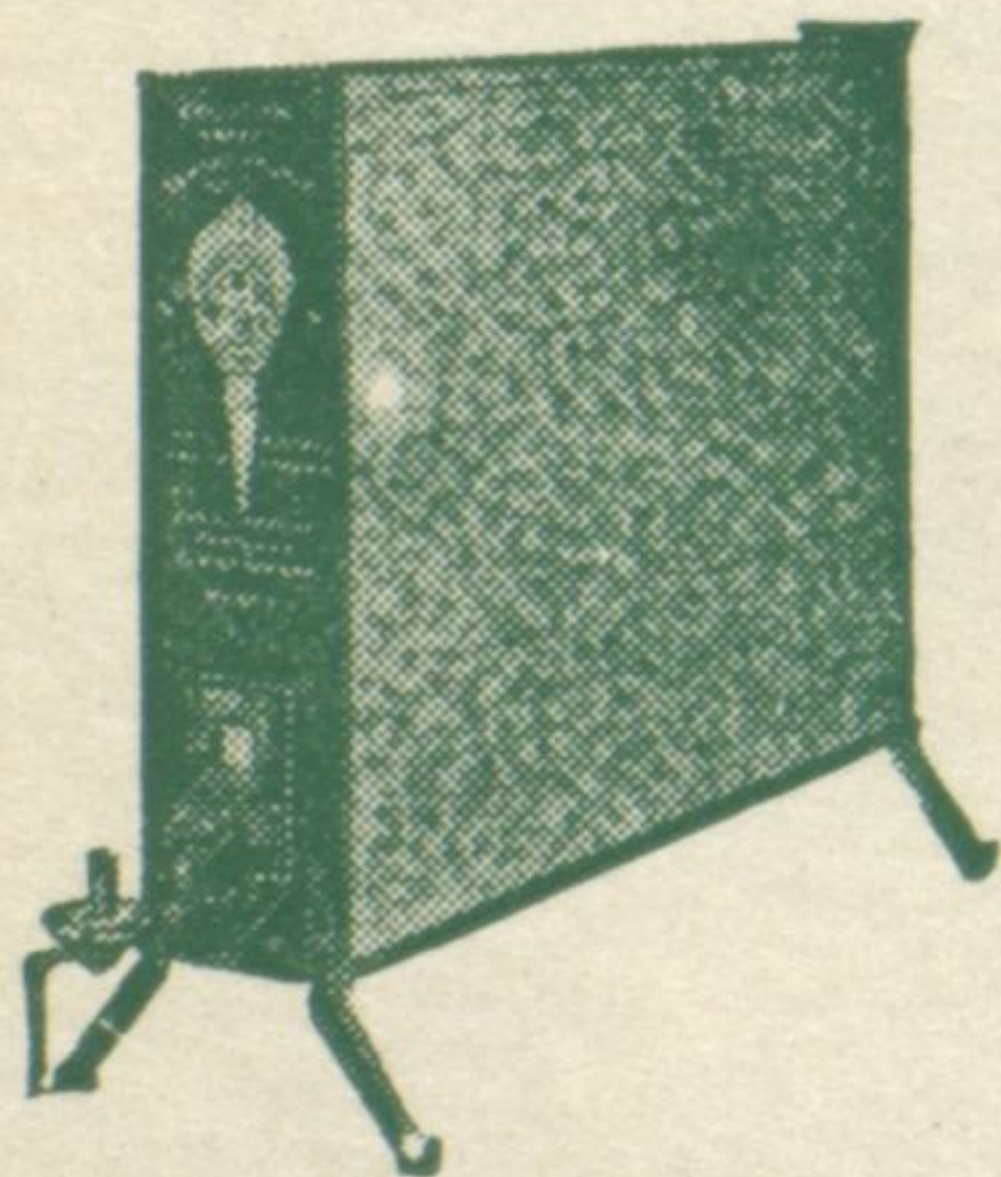

(let the pup be your furnace man)

Needless for us to give you all the finer details of

Automatic **GAS** Heating

A good modern Gas Heating Plant "needs no more care or attention than a pup can give," . . . not even a glance at the furnace for days and weeks at a time.

Your Car

Is it protected only from the rain, sleet and snow while sheltered in your garage?

This scientific safety Garage Heater

will heat your garage to an even temperature and give your car all the protection it needs against the colder weather.

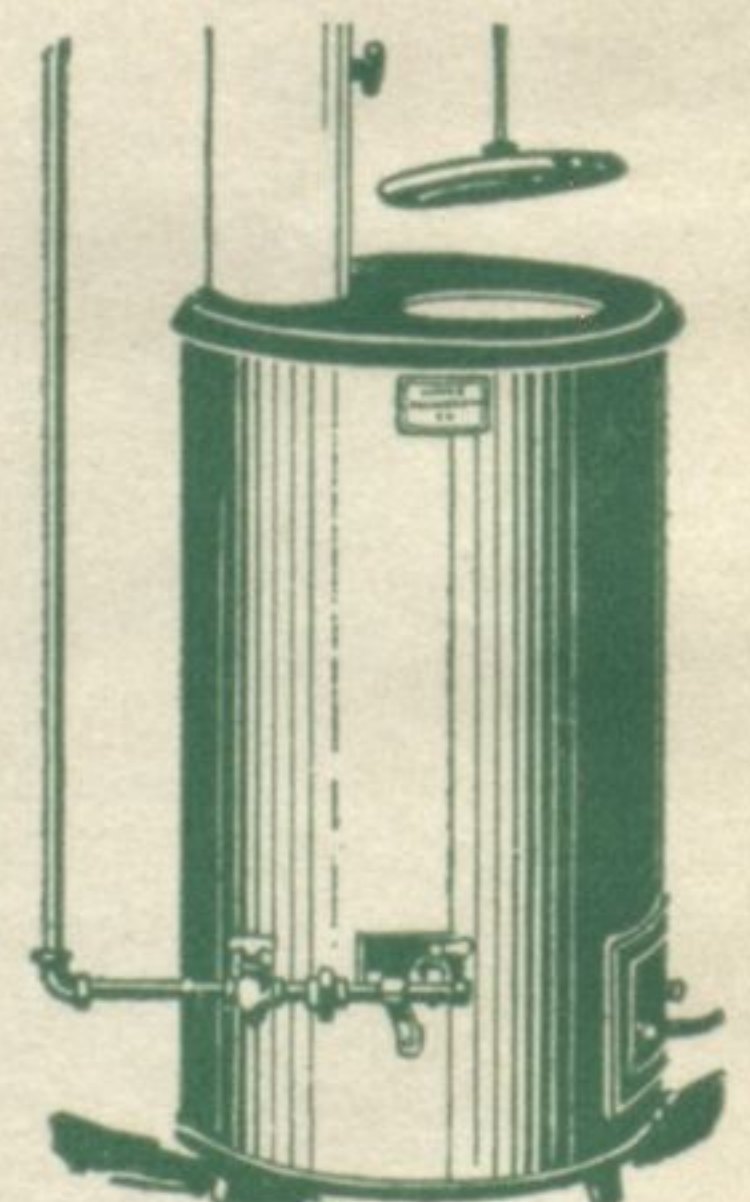

Radiantfire Heaters

makes a room more comfortable on real cold days and takes the chill off when your heating plant is really not necessary.

Home Incinerator

will remove the fire hazard of throwing loose papers around the basement. Installed in the basement and burns quickly and quietly without odor all refuse that you now must carry to the garbage can.
