

### NOVAES IS AMAZING

Winnetka Music Club Patrons Marvel at Brilliant Artistry of Renowned Brazilian Pianist

By RUTHEDA L. PRETZEL

Mme. Guiomar Novaes, last Monday night at New Trier High school, at the third of the Artist-Recital series sponsored by the Winnetka Music club, displayed an amazing skill in technique and expression. She played the numbers on her program as no other pianist has played them, and one came away with a breathless feeling that one had just witnessed a really great pianist.

Mme. Novaes took Bach's "Choral Prelude," which opened the program, with a splendid ease and depth. This, as well as the Brahms "Variations et Fugue sur un Theme de Haendel" which closed the group, were extremely well modulated, and were profoundly dignified.

The second group opened with "Night in Sevilla," by Niemann, a lovely liquid thing. It was followed by Poulenc's "En Auto," a short sketch played with delightful humor. As for the last of the group, Chopin's "Sonata in B Minor," enough cannot be said. Mme. Novaes has entirely mastered it and made her way through it as if she were at that moment composing it, so much a part of her moods it seemed. There was not a sharp angle anywhere. In Chopin's Funeral March, which is a part of this Sonata, Mme. Novaes brought out the terrible experience of Death, and made it an intimate sorrow. She was given an ovation after its performance by the thrilled audience. In response to it she played a delicate study by Chopin.

The four pieces in the third group were done with grace and a finished charm: "Indian Song," by Villa-Lobos; "Alcove of Turandot," by Busoni; "Serenade," by Strauss, which was especially delightful and lyrical; and "Fledermaus," by Strauss-Godowsky. Mme. Novaes generously compiled with the continued demands of the audience, with three encores: "China Town," by Niemann; "Jeune Fille Au Jardin," by Nompom; and "Polichinelle," by Villa-Lobos.

"—the soul that crept out through the hand of the painstaking mechanic"

"When I drive my car I feel the soul of the multitude of men that made it possible. It is true of every car in some sense; but more so of Cadillac than any other."

A Cadillac owner wrote this—after more than ten years constant use of one Cadillac car. Perhaps it may sound high flown as a tribute to a thing of metals and leather, glass and wood.

But how better can be expressed the religion (no other word will fit) of the men who build the Cadillac—"That Cadillac owners shall receive the finest that skill, and honest effort, and devotion to ideals can produce."
