Contacts

The Vital Spark of Business

A MOTIONLESS aeroplane changes into a living mechanism because of electrical contacts. And in business, contacts—contacts with men and industries—can lend a lifeless business both power and strength.

Contacts with many men over a wide territory and quickly—such contacts make for vision, foresight and unflinching drawing power.

The measure of your bank's value to you and to your business often lies in its ability to give you contacts—many and far-flung contacts.

The officers and directors of this institution are in contact with many businesses, banks all over the country and they are always glad to use these contacts in the service of our customers.
