Beauty Lies in Healthy EYES

It's not so much the size or color of the EYES that makes them beautiful. Rather, it's the glow which radiates from them. Urless kept always clean and healthy, EYES lack this alluring lustre. Millions of women throughout

The educational work of the railroad began with the establishment of English and Americanization courses in 1921. At the present time Americanization work is confined to the individual, usually in aiding applicants for citizenship. The scope of activities has steadily grown from this original basis of the North Shore line educational system and the co-operative plan now makes it possible for employes to prepare for the future through actual university training.

Company courses offered include public speaking, electricity, mechanical drawing, blue print reading, shop arithmetic, automotive engineering and air brake operation and theory. An extensive program with additional courses has been planned for execution during the present year.
