

*America
will gladly accept these cars
as leaders*

There is no conceit in our claims for leadership for the two newest ELCARS—the Light 8-in-Line, and the Six. By the *Shock-less Chassis* alone they are set above all other cars in riding qualities, and by their prices they are made unapproachable in value. You must in fairness see and drive the one ELCAR or the other before you can finally pass on the accuracy of these statements. We will be delighted to afford an opportunity to both see and drive the Eight or the Six, or both—you have but to tell us when to call.
