GIVES LECTURE ON
CHRISTIAN SCIENCE

(Continued from page 50)

as they are accepted by the individual, is to work a change in consciousness whereby his sense of pain or unrest, which is false, gives place to a sense of health and peace, which is true.

The Great Discovery

It will be remembered that Jesus, early in his ministry, healed all sorts of diseases and even raised the dead, through spiritual means. Finally, three days after his crucifixion, he came from the sepulcher, and appeared not once but several times to his friends and talked with them during a period of forty days. Then he ascended, that is, became invisible to the physical senses. He had demonstrated that individual life is indestructible and continuous.

It might be thought that the significance of such a stupendous accomplishment would never be forgotten, but, within two or three centuries, it was, very largely, until some sixty years ago, when, here in America, a spiritually minded and deeply religious woman, apparently approaching the end of mortal existence as the result of an accident, turned to her Bible for consolation. While she was reading one of the gospel accounts of healing performed by Jesus, a sense of strength and freedom stole over her. She arose, dressed, and presented herself to anxious friends, sound and well.

But she was not content with this. She must understand the process of spiritual healing. To this end she searched the scriptures and devoted her life. She found that Jesus, in overcoming disease, setting aside material laws, and abolishing death itself, invoked absolute Science, which he understood and which others can understand.

In order that the world at large might profit by her discovery, she set forth the fundamentals of this Science in her great book, "Science and Health with Key to the Scriptures." Afterward she established the Christian Science Church with its periodicals and other means for disseminating and guarding the truth. Thus it was, in brief, that Mary Baker Eddy became the Discoverer and Founder of Christian Science and earned the right to be called the Leader of the Christian Science movement.
