

To all ... Automobile Owners

All automobile engineers agree that the life of any automobile depends largely on the care taken of it, principally regarding lubrication. Regular lubrication of your car every 500 miles insures you a sweet running motor and a squeakless chassis, saves you many dollars in repair bills, cuts the

depreciation of your machine down to the minimum.

We are thoroughly equipped to give your car the expert lubrication it needs, regularly at every 500 miles. We have the most modern, high-pressure greasing equipment and take care to see that every moving part of your car is lubricated thoroughly. We have also three special oil spray machines that shoot graphite oil (under air pressure) between your spring leaves, in the crevices, between the body and the chassis, wherever there is a squeak or a possibility of one.

Drop in this week, better yet to-day, and get started on our regular 500 mile schedule.

HUBBARD WOODS GARAGE
