

SUGGESTIONS TO PARENTS

Supt. of Schools Carroll R. Reed, of Bridgeport, Conn., recently issued a special invitation to parents to visit the public schools of that city. He pointed out, in his communication to parents of the schools, that a visit to them would stimulate progress on the part of children and give the visitor an opportunity:

1. To make the acquaintance of the teachers of your children.
2. To learn the purpose of the studies which your children are taking.
3. To understand and appreciate the efforts which teachers are making to get results.
4. To find out how well your children are doing the work which is prescribed.
5. To learn what you as a parent can do to help.
6. To find out whether your children have been doing their home work profitably.
7. To explain to the teachers your ambitions for your children in order that the schools may meet their individual needs.
8. To inspect the building conditions which affect the comfort, health and safety of your children.
9. To investigate the moral atmosphere of the school where so much of your children's time is spent.
10. To rededicate yourself to the task of careful home training which shall co-operate with the schools for the future success and happiness of your children.

Spring Football Team Is Practicing Hard Now

According to Mr. Grater, assistant football coach at New Trier High School, the football squad is developing in fine shape. About 35 boys are out at present, and are all working for a place on the Varsity squad; for the first week, the squad has been working on fundamentals such as line blocking, punting, and passing. No letter men have come out yet, but several are expected in the next few weeks. Bob Burrows and John Cogswell of last year's team are acting as assistant coaches. Much promising new material has turned up, among them Smith who consistently punts 40 to 50 yards. Although most of the material is raw, the coaches hope for a successful team next year.

The Nation's New Vogue in Body Design
Styled by Nash

It is emphatically apparent today that Nash has created a new era in American enclosed body artistry with this arrestingly distinctive body design.

With its new symmetry of line, its classically beautiful French-type rear contour and French roof design, and its rich ensemble of costly car features, the new Special Sedan pictured above possesses magnetic appeal for those most keenly perceptive of motor car style and quality.

The steering wheel is of real walnut in fitting harmony with the handsome walnut finish of the inside window mouldings, door panels, the instrument board and the crowned panel which is above the instrument board. The gray toned upholstery is genuine Chase

Velmo Mohair Velvet, deeply tufted. And Nash powers it with a 7-bearing motor—the world's smoothest type.

So that in transcendent power—evenness and quietness, in lightning-fast "pick-up," and in easeful roadability on the straightaway or climbing, together with a world of speed, it stands out as the most notable car of its field.

As standard equipment there are Gabriel Snubbers at front; 4-wheel brakes, of special Nash design, with the front wheel brakes completely enclosed for safety's sake; and 5 disc wheels.

A larger Special Sedan on the Advanced Six Chassis, reflecting the same unsurpassed quality throughout, is offered at \$1695 f. o. b. factory.
