Dear Mr. Killian:

It is a great pleasure for us to tell you of the satisfaction we have had with the Aetna Automatic Oil Burner which you installed for us last fall.

The burner has proved most satisfactory both in supplying heat, and steam for our pressing machines. In the latter we find the burner far superior to our old coal heated boiler. Coal heat furnished us with only forty pounds of steam, while Aetna gives us seventy pounds, and we never need wait for lack of steam.

We had an experience last fall that might interest you. During the heavy rain-fall our basement became flooded with three feet of water, the automatic control functioned perfectly, stopping and starting, and not for one minute was there any danger.

Only one or two minor adjustments which you made have been necessary, and we feel that we have a most reliable and economical heating unit and do not hesitate to recommend the burner to any of our friends or to any of your prospective customers.

Yours very truly
