## McCormick Road to Be Illuminated by Fall of This Year

Specifications for a regular system of boulevard lights for McCormick road are being drawn up now and the lights will probably be installed early in the fall, according to E. J. Kelly, chief engineer of the Sanitary District. A lack of funds with which to work will prevent a lighting system from being installed before that time, said Mr. Kelly.

This announcement follows close upon a report given out last week that a traffic signal system would be installed and put in operation this summer along the entire length of the road from Devon avenue on the south to the northern outlet on Railroad avenue.

Mr. Kelly further stated that there is no plan on foot to extend McCormick boulevard from either its northern or southern extremity. Kedzie, he says, will furnish an outlet to the south as soon as it is completely paved. The original intention of the road builders to give an outlet for north bound traffic in the territory served by McCormick road was accomplished when it hooked up with Railroad avenue, stated the chief engineer. However, if a demand should be made for a continuation of the road to Sheridan, the Commission would consider it favorably, he thought, not only because of the benefit to the neighboring residents but because it would enhance the value of the district property along the canal.

The towns of Tessville, Niles Center, Evanston, Wilmette, Kenilworth, Winnetka, and Glencoe have already started plans to make McCormick boulevard a through street, and it is expected that the necessary ordinances will be passed at once.

The Cambridge chapter, Daughters of the British Empire, will hold its regular business meeting this afternoon at 2 o'clock at the home of Mrs. John H. Dyon, 1310 Ashland avenue.
