Generally Speaking
A Long, Cool Spring

There are no reminders of Summer's nearness in such a Spring as this has been.

And yet the warm days—we know from past experience—are bound to be upon us eventually. And with them will come regrets that we had not looked ahead with a little more foresight.

There are the summer clothes, for instance. Waiting until it's really warm before buying them often proves to be a regretworthy bit of procrastination.

Stocks, now, are beautifully ready. People who select summer wardrobes now will find the really suitable things. And in the accessories that stamp your individuality upon your costume, this early choosing is of still greater importance.
