

# Hot Water on Tap Every Hour of the Day or Night

Just think! What to you is the mere turn of a polished spigot was tedious hard work in the time of Washington and Lincoln. A huge open fireplace, clumsy crane and an iron caldron was their idea of a household Water Heating System. A far cry from that old time washing and bathing method, to the modern Gas Heated Storage Water Heaters.

Warm water is more refreshing in the summer than cold, because cold water is stimulating, starts the blood to circulate and consequently makes the blood actually hot. Warm water evaporates more quickly and therefore is soothing and cooling.

Let us install one of these modern automatic Storage Water Heaters in Your Home Now!

*During the month of July a generous allowance will be given on your old hot water heater or tank.*

*Call our office and let us tell you of these heaters and the easy way for you to have one installed in your home.*
