

C. and N. W. Will Install New Type Suburban Coaches

The Chicago & North Western railway new roller bearing suburban coaches were on exhibition Saturday, August 6. Added comfort for Chicago & North Western suburban patrons is assured with the installation of this first complement of the latest "North Western" design suburban coaches equipped with Hyatt bearings.

Within two months 120 coaches will be in service; each comfortably seating 98 persons, or one-third more than the old style coaches. Commuters will appreciate the riding comfort of Hyatt bearings which make starting and stopping easier, it is stated. These new, all steel and aluminum coaches are finished in tan walls, cream ceilings and green upholstery.

The windows have brass frames allowing more glass surface, and the double-acting doors in wide vestibules render passage easy. The electric lighting placed immediately over seats makes reading easier. Roofed and plated with steel-strong aluminum, each coach is nearly four tons lighter in weight than the old style coaches. They are absolutely fireproof.
