Women Hockey Team to Launch Practice Season This Saturday

The Winnetka Hockey club holds its first practice of the new season this Saturday morning, at 9 o'clock, at Skokie Playfield, Winnetka. Any women who care to play are asked to come out. School girls are not eligible. The game season starts October 8, and the schedule of games will be announced later. The Midwest tournament will be held at the Northwestern University stadium the last Friday and Saturday in November. The All-Chicago team will be entered in this, and it is hoped that Winnetka will have some players on this team. Every year, since its organization six years ago, the Winnetka team has had a number of members on the Chicago team. Last year it had two representatives on the United States team.

HEADS CHURCH CLUB

Charles D. Dallas, 1124 Pine street, president of the Dallas Brass and Copper company, has been elected president of the Church Club of Chicago. For the past two years Mr. Dallas has been vice president of the club, which is composed of five hundred business men of the city who are members of the Episcopal church. Mr. Dallas is a member of Christ church, Winnetka, in which he is an active worker.

Mr. and Mrs. Roger Sherman, 213 Linden street, are at home after spending the summer in Europe. Miss Louise Sherman is remaining in Paris for the winter. Miss Eleanor Sherman is in school in Dana Hall, Wellesley, Mass.

STATE LABORATORIES BIG FOE OF DISEASE

Professional and Public Demand for Laboratory Aid Constantly on Increase

Professional and public demand for laboratory aid in diagnosing and managing health problems is increasing by leaps and bounds, according to Dr. Isaac D. Rawlings, state health director, who points out that this type of service has doubled in volume within a year. Over a quarter million tests were made by the state diagnostic laboratory technicians during the last fiscal year while the staffs of municipalities and hospitals brought the total up to just short of a million. Private laboratories did a million and a half tests exclusive of X-ray and similar procedures. The Schick and Dick skin tests of which thousands were performed are also excluded as well as the examination of water, sewerage, etc.

"Rarely has any scientific medical activity seized upon professional and public imagination like laboratory service," declared Doctor Rawlings. "Within a period of twelve months the number of tests made in the State laboratory increased 58 per cent. The principal public health and private laboratories of the State did nearly two and a half million tests last year while private physicians and unlisted laboratories did thousands more.

"At the State laboratory tests are made for about fifty different diseases. Social infections lead the list in the volume of examinations by a safe margin. After them come tuberculosis, diphtheria, typhoid fever, undulant fever, Vincent's angina (trench mouth), hydrophobia, malaria, pneumonia, meningitis, septic sore throat, tularemia, glanders, typhus fever and a miscellaneous group of disorders. Samples of water are analyzed to establish the sanitary quality.

"The character of tests have changed with the increased volume. Thus in 1921 diphtheria led the list with 28,661 tests while last year it had dropped to seventh place with only 5,290 tests. That disease has decreased in prevalence in the same ratio that laboratory tests for it have declined

Mr. and Mrs. George Karnes, 151 Fuller lane, have as their guests over the week-end, Dr. and Mrs. N. L. Reynolds and Mr. and Mrs. Allan Widaman, of Warsaw, Ind.

BAKED GOODS

... that delight and nourish!

THE first bite - - you smile. The second - - you chuckle "h-m-m-m, s'good!" And after the first helping is gone, be it our Bread, Cake, Cookies or other baked delights, you'll ask for more. Not only do they satisfy but - - baked of the very best ingredients - - they're nourishing!
