

# THE SUN IS COOLING . . .

## HOW LONG IS YOUR MEMORY?

If you recall the hardships of winter driving—those mornings when every bit of your skill failed to start a frigid motor—you won't let similar experiences repeat themselves this year.

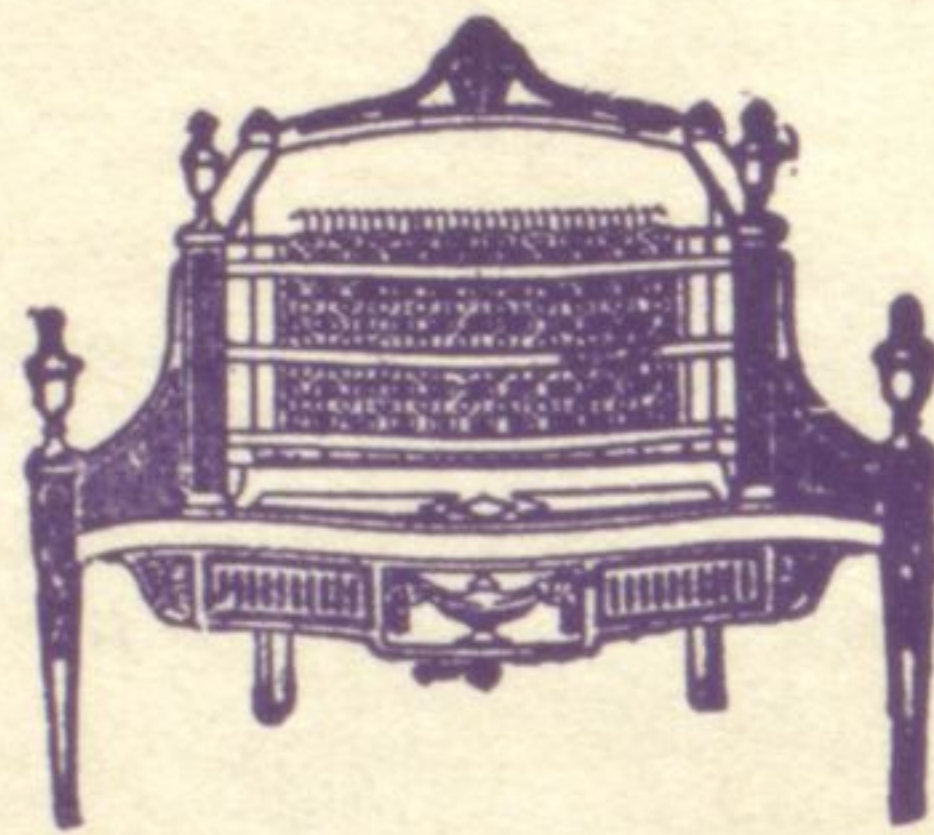

A warm garage—a motor that responds instantly—and you are off in a moment.

A GAS FIRED GARAGE HEATER—approved by the National Board of Fire Underwriters—holds the secret to pleasant winter motoring. Automatic control assures economical operation of this appliance.

but—

You can have heat these frosty fall days with a RADIANT-FIRE.

The glowing, cheery warmth of a RADIANT-FIRE assures you solid comfort the modern way—without the nuisance of ashes and dirt from your old fashioned fireplace.

Touch a match to RADIANT-FIRE and have instant heat.

## QUICK, CLEAN HEAT

for your kitchen and breakfast room is possible with an A-B Unified Range.

Why not let the gas that does your cooking also provide warmth on cold mornings?

Breakfast in a room from which the chill has been banished is a joy to every member of your family.

### DON'T TRUST TO LUCK!

The Blue Star Seal is a symbol of approval placed on gas appliances that conform to the rigid tests of the Laboratory of the American Gas association.
