

DAD TO HAVE HIS DAY

Will Be Among Honor Guests at Delta Gamma's House-Warming

Dad will have his day—Dad who has contributed so generously to the new sorority house fund of Delta Gamma—when the house has its official "warming" Saturday evening, the day of the Northwestern-Missouri game.

Mrs. J. Ralph Wilbur, a former national president of Delta Gamma; Mrs. Carl Latham, who has been a devoted worker for the new house; Mrs. O. F. Long and Mrs. Edwin Sherman, charter members of the local chapter, will also be guests of honor.

Presidents of the four organizations who will be hostesses—Mrs. J. W. Walker of the Mothers' association, Mrs. Edwin W. Lane of Nu Sigma chapter, Mrs. Hilda Frey of Chi Sigma chapter, and Miss Martha Meaker of the active chapter, will be in the receiving line. Mrs. C. C. Fisher is social chairman for the evening and will be assisted by Mrs. D. S. Harris, Mrs. Irving S. Cutter, Mrs. H. W. Whitehead, Mrs. C. G. Grulec, Mrs. G. M. Ludlow and Mrs. F. P. Luther. It is a matter of deep regret that the national president of Delta Gamma, Mrs. J. N. Woollett of Indian Hill, will be absent from home and unable to be present.

Sanitary District Plans to Clean Up Polluted Streams

A \$1,864,720 contract awarded to The Underground Construction company this week for construction of the second section of the Salt Creek Intercepting sewer forges a new and important link in a Sanitary District of Chicago program designed to clear all sewage pollution from streams flowing through Cook county.

President T. J. Crowe of the Sanitary district is authority for the statement that by October of next year the sewer project will have removed from the Des Plaines river and Salt Creek all sewage now pouring into the streams, in untreated form, from North avenue south to Riverside.

The only remaining work can be let, according to Mr. Crowe, as soon as enabling ordinances are received from Brookfield and La Grange Park, which involves only the far western portion of Salt Creek.

The new contract, known as Section Two, calls for the building of six and one-half miles of large sewer starting at Harlem avenue and 43rd street and extending west to La Grange park and north to Roosevelt road, and supplements the first contract on the project, awarded last August, which provided for the laying of two miles of sewer from the West Side treatment plant at Stickney to Harlem avenue.

In addition to solving the stream pollution problem in a practical way, the new sewer brings to nine suburban communities assurance of early and permanent solution of their drainage problems by connecting them with the great West side plant, now under construction at Stickney at a total cost of \$42,000,000.

HEADS FRESHMAN CLASS

Jane McKinney, daughter of the Charles McKinneys of 1215 Tower road, has been chosen president of the freshman class at Bradford academy, Bradford, Mass. Her parents received notice Wednesday of her election.

Members of the University of Illinois football team spent the night prior to the Northwestern-Illinois game at the Wilmette Golf club on Lake avenue.

Y. M. C. A. Experiences Most Prosperous Year

More than one million young men are now members of the North American Y. M. C. A., while the financial contributions from voluntary friends are the largest on record. Operating expenditures of the past year doubled those of ten years ago.

These facts were revealed in reports presented before the fourth annual meeting of the National Council of the Y. M. C. A.'s of the United States, held this week in Chicago. This group of 375 forms the legislative body of the associations of this country. Two-thirds of the number are laymen. David W. Teachout of Cleveland, Ohio, is president of the National council. His successor will be chosen at the meeting.

Martin H. Bickham, 429 Ninth street, Wilmette, is a member of the National council of the Y. M. C. A. and attended the convention in Chicago.

SEWS FOR CHILDREN

The North Shore Catholic Woman's league held its October philanthropy meeting Tuesday, at the home of Mrs. Anthony Eiden, 806 Foxdale avenue, Winnetka. The members sewed on sheets and pillow cases for the chil-

dren's ward at the St. Francis hospital. Mrs. N. P. Anderson of Evanston is the philanthropy chairman of the league.

The average production of crude oil in Illinois during 1926 was 20,000 barrels per day.

Our Washing Is Not Done at Home

The washing must be done—the family must have clean clothes—even if Mother does have to give a precious day each week to doing or supervising the work. That was a weekly story in my house, until one day a friend persuaded me to send the washing to the Washington Laundry.

When I opened the returned bundle I was convinced. Everything was returned sweet and clean, ready to wear and use. It cost me less than I would have paid a laundress.

Rough Dry

Flat work ironed-clothes dried — 13c per pound up to 20 pounds. Additional weight, 10c per pound. Minimum bundle, 7 pounds. Handkerchiefs 2c each.

But sending it to the Washington Laundry means more than clean clothes — it means "time." And what wife or mother can't use more time! Call University 5900 and make your next wash-day a leisure-day.
