

A Luxuriously Warm Kitchen at Breakfast Time

Get a \$12.50 allowance on your old stove for a modern A-B Unified Gas Range. Our easy monthly payment plan is at your service

For Your Clothes' Sake Use a

CANTON CLOTHES DRYER

This gas heated laundry appliance dries your clothes the modern way. You do not have to lug a heavy clothes basket to the back yard or basement drying room, for the CANTON CLOTHES DRYER may be installed in the same room in which your washing is done.

When your clothes are hanging on a line they are exposed to dirt floating in the atmosphere. Particles of dust cling to the wet clothing—and while the washing may appear to be spotless when it is taken down for ironing, it cannot be absolutely clean.

The CANTON CLOTHES DRYER—Dries—Bleaches—Sterilizes. Your clothes come in contact with pure, radiated heat. This threefold action of the dryer quickly prepares your washing for the iron.

The CANTON CLOTHES DRYER is made in sizes small enough for the bungalow and commodious enough for the largest apartment or institution.

You may secure your gas appliances easily through our budget plan. This system has been devised for your convenience. Visit the North Shore Gas Company office in your neighborhood and have it explained to you.

Don't shiver while you are preparing the morning meal before the furnace has had time to warm your home. And your family doesn't have to huddle around the table in a cold breakfast room. For the A-B UNIFIED GAS RANGE is an ideal auxiliary heating appliance that radiates plentiful heat while it is cooking your breakfast.

An A-B UNIFIED GAS RANGE performs double duty for you. And it does this without any additional cost while cooking. For the same fuel consumed in cooking is utilized to heat your kitchen or breakfast room.

There are times, also, besides morning when you need additional heat in the kitchen. With an A-B UNIFIED GAS RANGE at your service, this warmth may be had easily and economically.

The Sign of a Modern Home

Just as you find pleasure in your home itself—you can enjoy the additional comforts afforded by gas appliances marked with the "Blue Star Seal." A gas appliance bearing this stamp is your assurance of its reliability; for every piece of gas equipment that has passed the stringent tests of the Testing Laboratory of the American Gas Association is marketed under this seal.

Experts in the American Gas Association Laboratory know from long experience just what should be expected of a gas appliance. The Blue Star seal is a badge of merit placed by them on an appliance that performs with smooth efficiency and at a minimum of cost. The seal is not a name but a standard.

Wherever You Find Radiant-fire You Find Comfort

Hand in hand—inseparable companions—go RADIANTFIRE and COMFORT.

Why endure that aggravating chill, that has taken possession of your bedroom during the night, when you get up in the morning?

Why miss the pleasure of fireside warmth on fall and winter evenings?

Summon *Radiantfire*, and *Comfort* will come with it.

There is nothing better for your disposition and health than quick, clean heat when and where you want it.

RADIANTFIRE leaves no ash—no dirt—no muss of any kind.

A Few Ashes

are all that remain of your garbage and rubbish when you dispose of them in a

GAS FIRED HOME INCINERATOR the modern appliance for the prevention of fires caused by accumulations of trash and of disease resulting from the old-fashioned, unsanitary garbage can.

The Gas Fired Home Incinerator will burn rubbish or garbage wet or dry, and will reduce a full load to a pint of ashes in a few hours.

The air tight compartment in which refuse is burned gives objectionable odors no chance to escape.

Wipe out the fire and disease hazards in your home with a modern GAS FIRED HOME INCINERATOR.
