

Announcement

We announce with pleasure that we have secured the services of
Mrs. Ruth Dunford
 Kickernick
 Educational Director

For Monday, Tuesday and Wednesday, December 12, 13, and 14.

Mrs. Dunford will explain and illustrate the Kickernick Idea in Undress. We sincerely trust that you will visit the store some afternoon during this time and meet her. We are sure you will find it much worth while.

The front of the body is longest when standing and the back shortest.

The length of the back increases almost one third when the body is bending or sitting.

This cross section of the garment shows the patented construction which permits the body to sit right into the back of the garment without strain through the crotch.

This prevents chafing, pulling, or cutting.

The length in the back required for bending or sitting is provided by means of tiny pleats placed at the hip-joint where the body bends.

This prevents pulling down at waist or up at knee.

The trim form-fitting front holds the back in proper position.

As a Christmas Gift

The donor of a Kickernick gift will be remembered throughout the year, and the recipient will be silently wishing for another Kickernick Gift when the next holiday season approaches.

Mr. and Mrs. Sidney Eastman entertained a few friends at tea last Sunday evening at their home in Kenilworth.

Council Hears Objections to Corner Widening

Proceedings in progress for the widening of the Tower and Green Bay road intersection with a view to speeding up traffic at this narrow roadway corner, have been halted by the Winnetka board of local improvements until the Streets Drainage and Forestry Trustee of the council, of which Trustee H. L. Raclin is chairman, may investigate objections which have been filed against the improvement.

Property owners residing north of Tower road and east of Green Bay, whose children are compelled to cross one or the other of these streets at this corner on their way to and from school, have presented to the board objections to the street being widened. They contend that it will only increase the hazard to their children, in that it will enable cars to be driven at greater speed at this corner than now prevails, and feel that if the council decides that it is necessary to widen the streets, it should, for the sake of safety, place "stop and go" lights at the intersection.

Erwin P. Snyder, living at 939 Tower road, appeared before the board Tuesday evening, explaining the situation from the viewpoint of himself and his neighbors, following which the board referred the matter to Trustee Raclin's committee for further study.

Miss Lois Truesdale of 570 Arbor Vitae road will entertain December 21 for the girls who are home from college. She will have forty guests for luncheon and bridge.

Mrs. Robert Berger entertained her bridge club last Wednesday at her home on Kenilworth avenue.
