Your automobile is put to a rigid test these days. . . You call upon your car to take you through all sorts of weather and over dirty and wet pavements, and you still expect your car to render service and, —after a year or two of use, it must have a fair "trade-in" value.

When dirt freezes on your car it not only damages the finish if left there, but it also causes serious damage that results in squeaks and rattles in the parts exposed underneath.

Allow us to keep your car clean . . . the cost is very small if you consider the appearance and operation of the automobile.
