Wednesday, January 25

Meeting of the Woman's Alliance in the Church House. Sewing at 10 o'clock, Luncheon at 12:30. At 2 o'clock Mrs. Harry Eugene Kelly will speak.

D. A. R. MEETING

The next meeting of the Skokie Valley chapter of the Daughters of the American Revolution will be held at the home of Mrs. E. D. Snyder on Chestnut avenue, Kenilworth, at 2:30 o'clock, Monday, January 23. Mrs. Edwin Hedrick will present a program of war poems.

Mr. and Mrs. Ira Calif Darling, 256 Kenilworth avenue, Kenilworth, and Mr. and Mrs. Sidney Y. Ball of Indian Hill left for California where they will stay for about six weeks. They may go on to India, although no certain plans have been made yet.

Lew Wallace's "Ben Hur" Coming to Varsity Soon

"Ben Hur," the film version of Gen. Lew Wallace's immortal story of the Christ, is scheduled to appear at the Varsity theater in the very near future. Featuring Ramon Navaro, "Ben Hur" is doubtless one of the most gripping photoplays ever presented. It is a film that tears at the heart—that moves an audience to tears and crushing joy, building, ever building, straight from the beginning through to a marvel in dramatic climax. You'll like "Ben Hur" as you have seldom liked a picture.

Kenilworth Club Offers Lecture by Dr. Grenfell

On Friday evening of next week the Kenilworth club presents another of its splendid offerings by the entertainment committee, Dr. Wilfred T. Grenfell, the famous medical missionary, in a lecture profusely illustrated by stereopticon, entitled "Midst Ice and Snow in Labrador." In the presentation of the lectures by Dr. Grenfell is unfolded one of the epic stories of work and service in wild and inaccessible lands. In 1892 Dr. Grenfell first visited the coasts of Labrador and Newfoundland in a hospital sailing ship to see if medical and surgical service could be established, and from this simple beginning has grown during the past thirty years one of the great service works of the world. There are now along one thousand miles of coast, a chain of six hospital ships, four nursing stations, two orphanages, some small schools, an industrial work, a Seamen's institute, a hospital steamer, and a fleet of auxiliary power yawls.

When the winter ice cuts off communication with the outside world and the floating population has departed, the boats are laid up and part of the hospitals are closed. Dog teams are used and long patrols established. Swathed in wind-proof garments the doctors of the International Grenfell association and their helpers travel over hundreds of miles of wind-swept and icy barrens or the frozen bays of the North Atlantic.

Spanish Dinner Dance to Be Skokie Club Feature

The dining room at Skokie Country club will be transformed into a Spanish cafe, and the living room will become a Spanish garden, for the dinner dance to be given this Saturday evening at the clubhouse. Waitresses in Spanish costume will serve only Spanish food. Cope Harvey supplies the music for dancing.

The children's party last Saturday afternoon was pronounced a huge success by the three-hundred children who attended. Ice cream and cake was served, and each child received a balloon and a bag of candy. Besides H. C. Niegelsen's magic tricks, the main attraction of the party was the artificial fish pond which had been built in the living room between the two big fireplaces, and from which the guests fished prizes.

All idea of winter sports, including the Eskimo carnival which was to have been given Saturday, January 28, has been abandoned in favor of golf, because of the unusual mid-January weather.

Holly Hill Golf Links Lure Florida Resorters

Many north shore residents are enjoying life in Davenport, Fla., at this season, and, more particularly, the excellent golfing facilities provided at the Holly Hill Golf and Country club in that locality.

An 18-hole golf course was opened this season, said to be one of the sportiest courses in the great winter resort state. The links embody the most advanced features of modern golf course design, it is stated, and compare favorably with the finest in the country. Many members of north shore clubs are familiar with the first nine holes of the completed course, which have been in play for several seasons.

Mrs. Frank Nason, formerly of Kenilworth but now of Winnetka, entertained the Monday sewing club last week. Members of the club include Mrs. Roy Osgood, Mrs. John P. Oleson, Mrs. Walter Launder, Mrs. Frank Cherry, and Mrs. John Roberts.

THE ONLY CAR OF ITS KIND IN THE WORLD

For numberless puzzled motorists Dodge Brothers new Victory Six will simplify the problem of selection, for nowhere in the world is there a car like it. Greater expenditure will not duplicate it.

To possess this car's unique advantages you must possess this car.

A Radical Departure in Body Design

In The Victory, for the first time in history, the body sill is eliminated. Body and chassis are built as a single integral unit.

Thus, the wide, deep chassis frame of The Victory, now flush with the lines of the body, avoids the customary overhang of a wide body upon a narrow frame; and the chassis itself, rather than the body, supports all weight—body, floor, seats and passengers.

Amazing Results

The results of this construction are astonishing.

330 body parts are eliminated.

175 pounds of superfluous weight are cast off.

The all-important CENTER OF GRAVITY is materially lowered.

Without the slightest sacrifice of head-room or road-clearance, the over-all height of the car is also lowered—one of the secrets of The Victory's great beauty.

The amazing resources of the car's brilliant

power plant are multiplied still further by perfect distribution and economy of weight.

Power in relation to load is materially increased—pick-up quickened—far greater flexibility achieved.

21 valid miles per gallon at 25 miles per hour is made possible FOR A SIX! Incredible smoothness at high speed is another great gift of this new design!

Elimination of back-wheel "chatter" when the 4-wheel Lockheed-Hydraulic brakes are quickly applied is still another!

And thanks to The Victory's low center of gravity and wide chassis frame, swaying, skidding, tipping—each a factor of weight and its proper and improper placement—are reduced to a new and negligible minimum.

Another New Safety Feature

Yet Dodge Brothers have taken a further revolutionary step to insure the safest motor transportation it is possible to create.

For the first time in automobile history, they have applied the so-called battle-ship construction to closed car design.

In other words, the body has a double steel shell, locked together, with an air space intervening—is actually TWO bodies, one within the other—yet lighter by 175 pounds—and the safest body known.
