

*New Business Block in Ravinia*

FOLLOWING out the growth of the business section on the North Shore from Wilmette to Glencoe, the business section of Ravinia, west of the tracks, is now showing signs of activity that has characterized the other suburbs for the past few months. One of the new business buildings under construction there, and the largest in size is that shown here, which is being built by a syndicate headed by Jules Urbain of Glencoe, a member of the firm of Olsen & Urbain, architects. It is located at the southeast corner of Roger Williams avenue and Pleasant avenue.

This building is being built in two sections, the first of which is now being completed. It is expected that work on the other section will start in the near future. Of face brick construction, in the English suburban design which is becoming popular on the North Shore, this building combines in one the efficiency of the store build-

ing with the artistic beauty of the suburban village.

*Kenilworth to Have First New Store Building Since 1912*

With all preliminary work—including the issuing of a permit by the Village of Kenilworth and the drafting of plans by the architects—completed, Harry Lynn, proprietor of the Kenilworth Grocery, is now awaiting the receipt of bids from the various contractors interested, on the erection of a new two story store and apartment building at 521 Kenilworth avenue.

The building, which will be of pressed brick and terra cotta and will cost about \$35,000, will front 50 feet on Kenilworth avenue and will be 70 feet in depth. There will be two stores on the first floor and two six-room apartments on the second floor. All of the stores will be rented, Mr. Lynn states, and the Kenilworth Grocery will continue to occupy its present quarters at 419 Richmond road.

Mr. Lynn anticipates that all bids will be received within the next few days and expects to close the contract with the successful bidder as soon thereafter as is possible. Ground will be broken immediately following the letting of the contract and the work will be pushed as rapidly as possible so as to permit its completion by mid-summer.

The new building will be erected in compliance with the present building and zoning codes, enacted in 1923, and will be the first commercial structure to be erected in Kenilworth since 1921 and the first store building to be built since 1912.

**DEERFIELD—VACANT**

650 feet, 3 blocks from station. All improvements are in. \$25 per ft.

17 acres, thickly wooded, fronting Deerfield Road and Golf. \$1,200 per acre.
