

# If Men Did the Housework

most homes would be equipped with EverHot Automatic Water Heaters. The modern business man knows the advantages of labor saving devices. He will not do anything that a machine can do, nor will he have his help do anything that a machine can do.

The executive of the home—the housewife—can realize the same advantages from labor saving devices in the home. One of the greatest of these is the EverHot Automatic Water Heater. It greatly lightens the drudgery of routine of the household, speeds up the work and gives her more time for the bigger and better things of life.

An EverHot Automatic Water Heater, too, adds greatly to the comfort and joy of the home just as much for the men folks as for the women folks. They are priced so as to be within the reach of all—deferred payments if you wish.

## HERE'S A GOOD TIP

When you buy an automatic water heater, consult a good plumber. It's part of any plumber's business to understand the merits of the various automatic water heaters on the market. Get an unbiased, impartial opinion from your plumber. He is the man who knows. It is a significant fact, however, that more plumbers throughout the United States have EverHot Heaters in their own homes by far than any other make. Here are the leading plumbers in the North Shore district—ask them.
