

SAVE YOUR GAS!

Rock Wool Insulation

The EverHot Heater is insulated with an inch and a half of rock wool packed between two concentric cylinders of steel. Rock wool is recommended by the United States Bureau of Standards as one of the best insulators known—nearly 100 per cent better than asbestos.

This Saves Gas

Long Narrow Flueway

In the EverHot Heater the entire outside surface of the hot water storage boiler is used as heating surface. A long narrow flueway entirely surrounds this large heating surface. The products of combustion leave the heater at not more than 60 to 70 degrees above room temperature, giving the lowest vent loss of any automatic water heater on the market.

This Saves Gas

The Thermostat

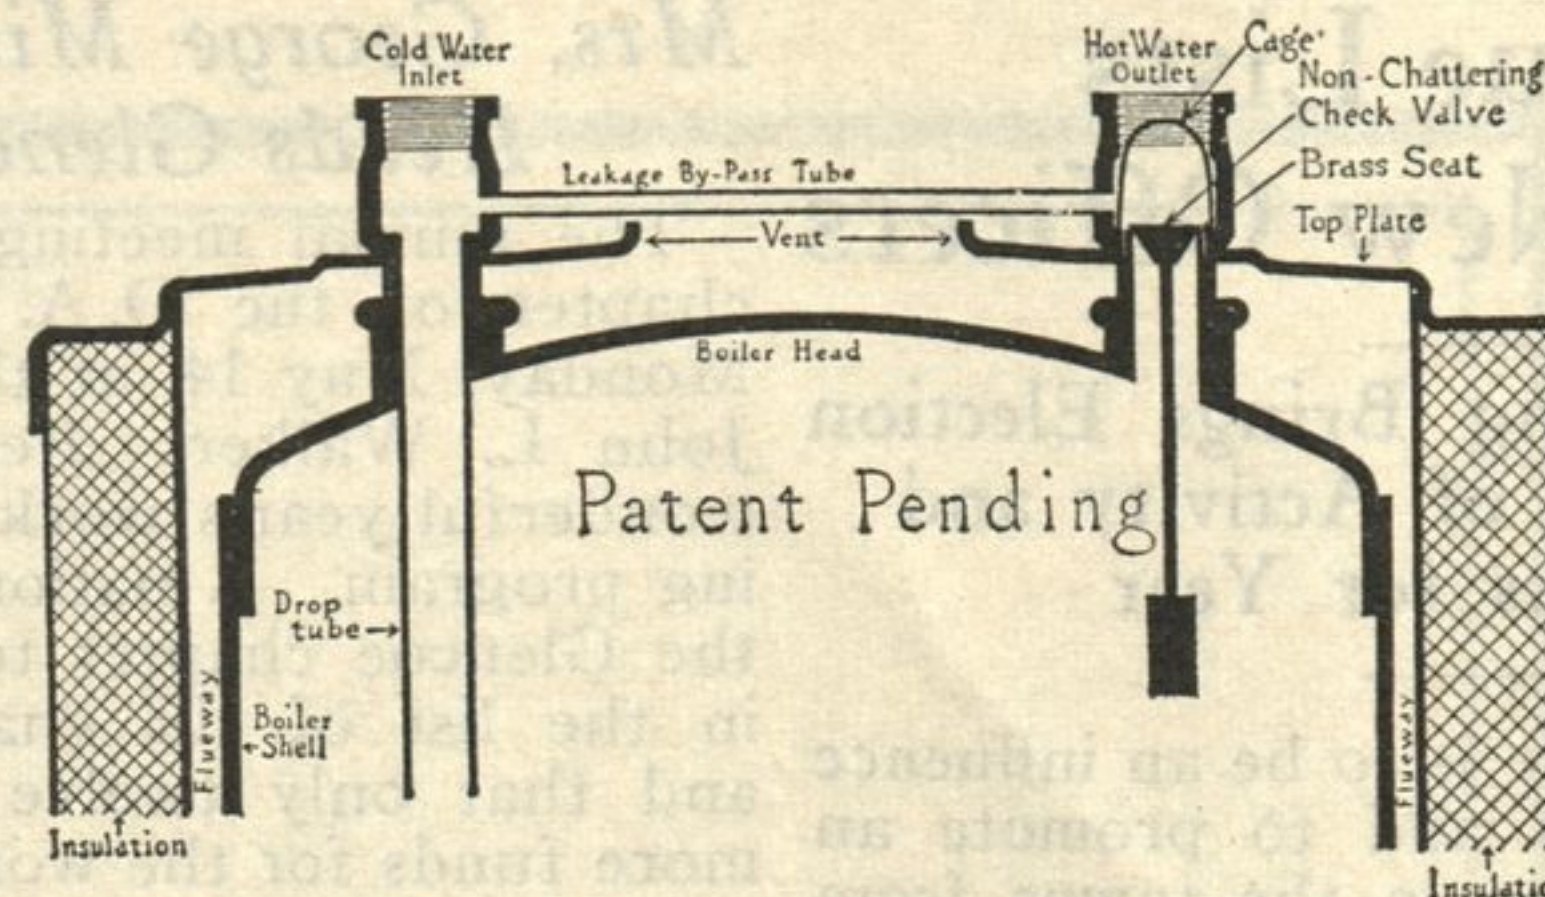

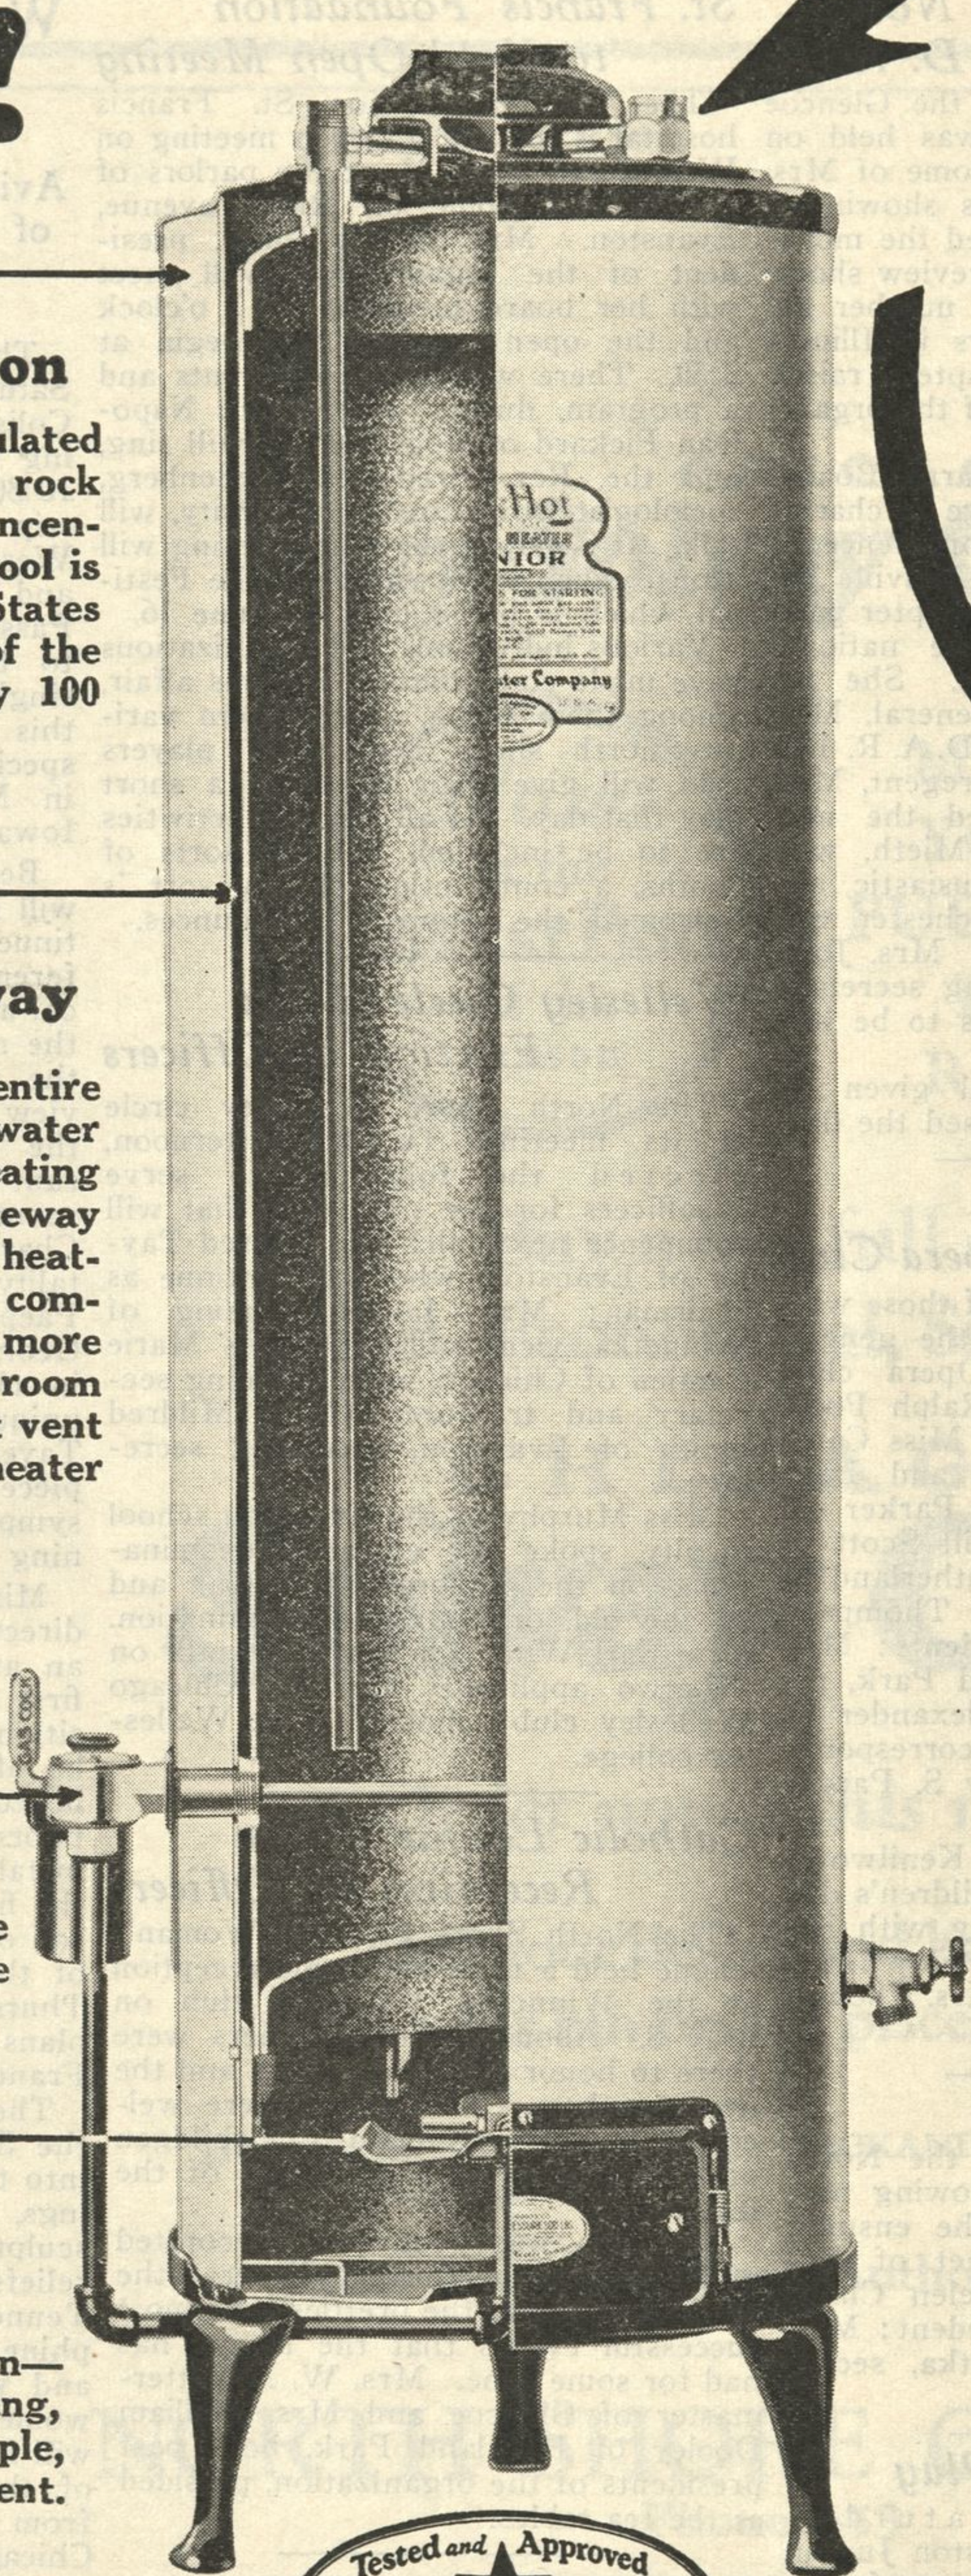

Extremely rugged and simple in design, and at the same time sensitive and accurate.

This Saves Gas

The Burner

The burner is our own design—non-backfiring, non-carbonizing, semi-bunsen burner. Simple, trouble free and highly efficient.

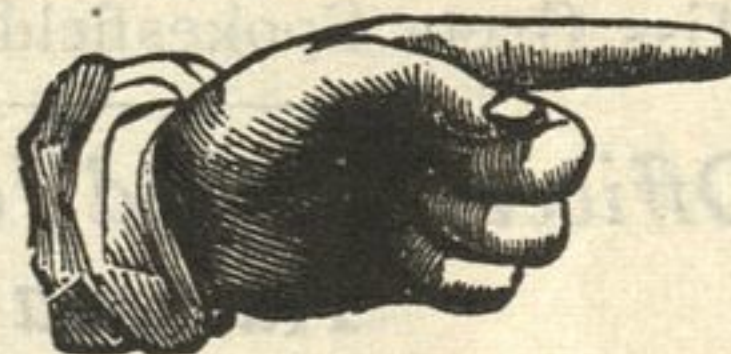

This Saves Gas

This Is the EverHot Leakage By-Pass. No Other Heater Has It. It Saves Gas

Astonishing!

What a Faucet Leak Means

- $\frac{1}{32}$ THIS OPENING will pass 260 gallons of water in 24 hours at 50 lbs. pressure.
- $\frac{1}{16}$ THIS OPENING will pass 1100 gallons of water in 24 hours at 50 lbs. pressure.

TRY THIS

Open any hot water faucet slightly until it passes about one pint per minute. You will be surprised at the small size of the stream. A dribble of this size, running constantly for one month, will waste 5400 gallons of hot water at a cost of about \$10 with gas at \$1 per M. The EverHot leakage by-pass saves this waste.

The EverHot is the acknowledged leader because of its quality, simplicity, durability and economical operation.

Priced \$66.00 to \$195.00
