Course Prices: \$16.00, \$14.00, \$11.00, \$7.00, and \$5.00

North Shore Girls Help

Edit Daily Northwestern

The mere men employed on the Daily Northwestern, official student publication at Northwestern university, took a vacation May 16, and the entire task of producing the newspaper, from gathering the news to putting the pages to bed, was performed by co-eds, all members of Theta Sigma Phi, women's professional fraternity.

Marjorie Feakins, 301 Temple Court, Winnetka, acted as managing editor, with Mary Deutch, 1424 Devon avenue, Chicago, as city editor. Elizabeth Howe, of Deadwood, South Dakota, a regular member of the editorial board, was for the day promoted to its chairmanship. She was assisted by Miss Maxine Boord of Omaha.

Society events were written up by Ruth Kinne of Wilmette.

Mr. and Mrs. Brownell T. Bradstreet, 259 Church road, have left on a three weeks' motor trip to the East. They will attend Spring day at Cornell and visit in central New York before going on to New York City for the remainder of their stay.

PLAN SURVEY OF FIGHT AGAINST TUBERCULOSIS

Illinois Department of Health to Test Efficiency of 16 County Sanitariums

Are the sixteen public county tuberculosis sanitariums in Illinois doing their stuff? Which ones are the best and why? Are the beds full of patients or not? What type of tuberculosis patients are being treated and how successful is the service in curing the sick and protecting the healthy? Answers to these pertinent questions concerning the state's two million dollar per year venture in sanitarium maintenance will soon be forthcoming as a result of a survey now in progress under the direction of Dr. Isaac D. Rawlings, state health director.

"Forty-seven counties are collecting in taxes close to \$2,000,000 annually for waging war on tuberculosis," said Dr. Rawlings. "In Adams, Champaign, Cook, DeKalb, Kane, LaSalle, Livingston, McDonough, McLean, Macon, Madison, Morgan, Tazewell, Will, Winnebago and Woodford, public sanitariums are operating. The other 31 counties use funds collected through tax levies for providing tuberculosis citizens with sanitarium care in institutions not their own.

Make Efficiency Rating

"The survey now in progress has been undertaken in order to show the efficiency of the county sanitariums now operating. A personal investigation of prevailing conditions will be made of each. Observation of every important factor in the operation of a sanitarium will be made and a rating given to each. The result will be an efficiency score or rating, based upon 100 points, that will show at a glance the comparative standing of each institution.

"The character of the medical and nursing service is the most important item in the survey schedule. A perfect rating on this item gives 60 points on the score sheet. The number and amount of specialized training of the medical and nursing staffs, the manner in which they examine and manage patients and the sort of records they keep determine the rating.

Comprehensive Survey

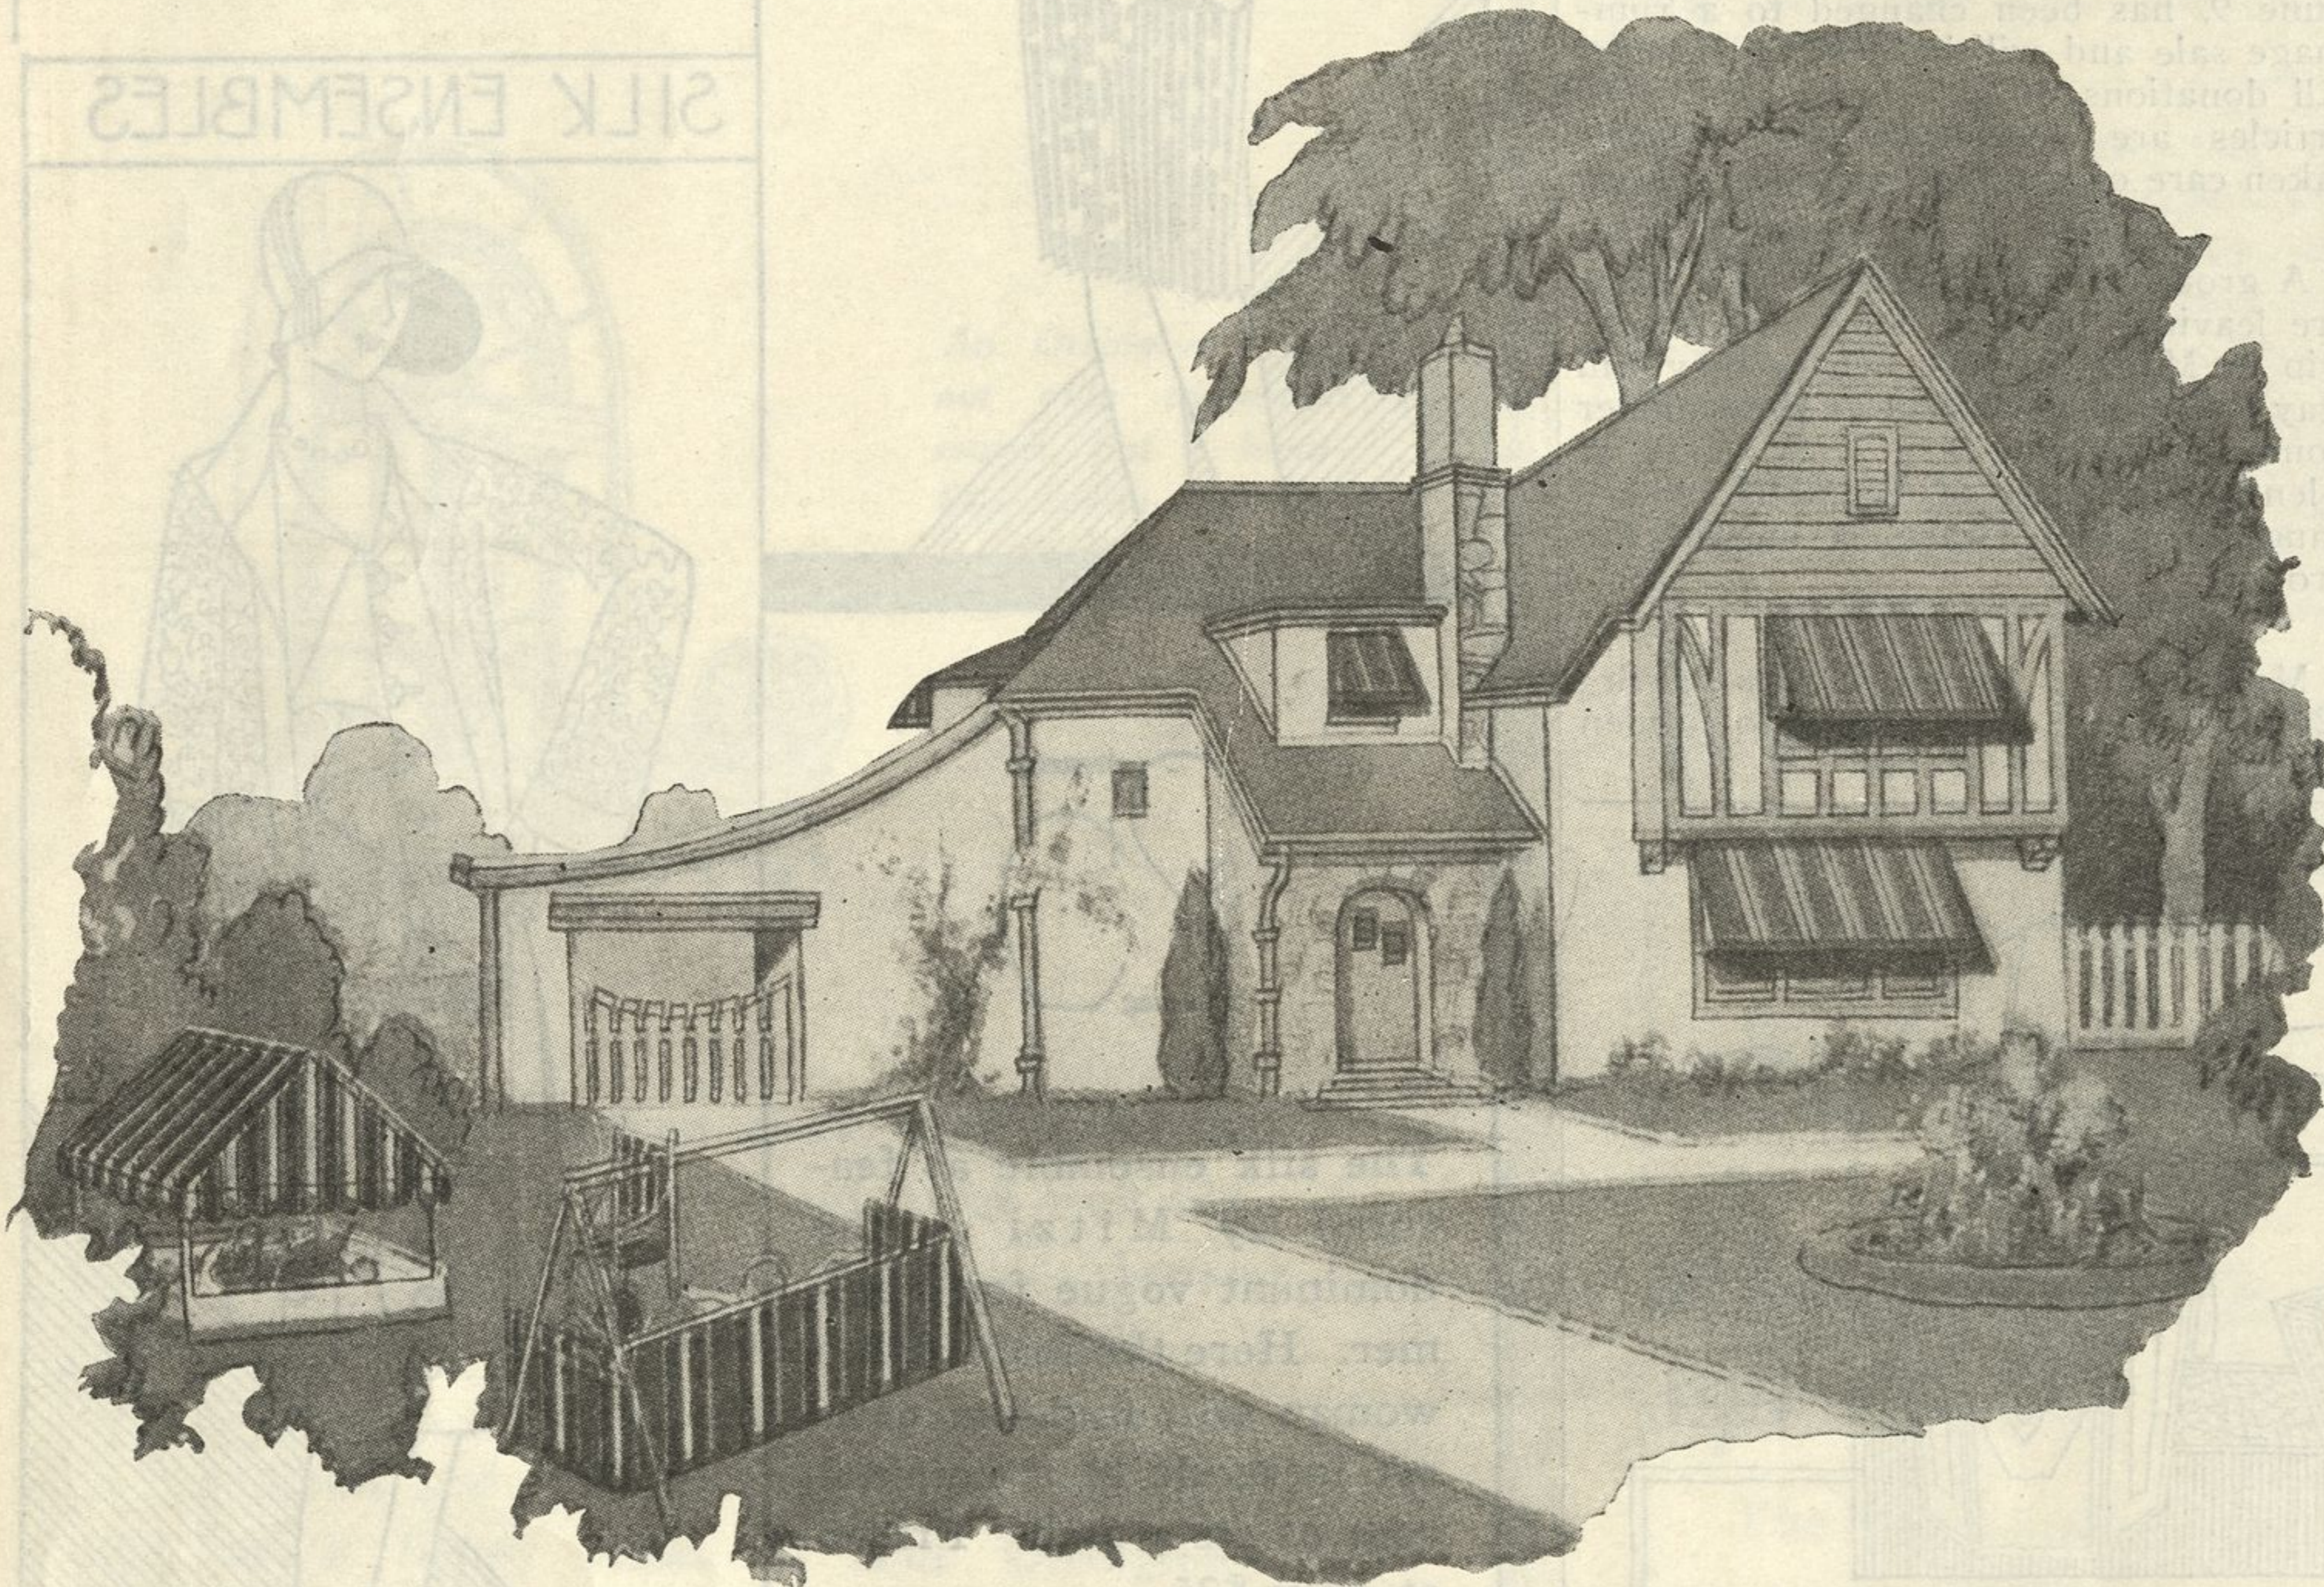

"Other items embraced in the schedule are administration, which is valued at 20 points in a perfect score; plant and equipment, 10 points; field service of a public health character in the county, 6 points; location of sanitarium, 4 points. Information concerning the number of patients handled last year, the number now in the sanitariums, the number of incipient and advanced patients, the per capita cost and the results of treatment for each patient will also be collected.

"The results of this inquiry will show to the public and to the sanitarium boards the good and bad points in the operation of the 16 county sanitariums. They will be helpful to others in selecting sanitariums for pay patients and they will be invaluable as a guide to forming new policies and new activities in sanitarium operation.

"The battle against tuberculosis is tightening all along the line. Progress against the disease grows harder each year as the more obvious channels of spreading are dried up. The public sanitarium is a very important factor in the fight when it operates at its best."

CHRISTIAN SCIENCE SERVICE

"Ancient and Modern Necromancy, alias Mesmerism and Hypnotism, denounced," will be the subject of the services Sunday, May 27, at the First Church of Christ, Scientist, in Winnetka.

The CHARM of BEAUTIFUL AWNINGS

Decorators and home-owners today seek awnings that *enhance* the beauty of a home instead of detracting from it. It was to meet this new demand for really artistic awnings that Blasius Awning Stripes were originated.

From the gay canopies of old Moor-

ish Spain . . . the Orient . . . the fashionable Riviera . . . inspirations were taken for the many brilliant color combinations in which these lovely awning-materials have been rendered. Each design is distinctive . . . each is rich in glowing colors, harmoniously blended.
