

# COSTS LESS - - - DOES MORE!

An EverHot Automatic Water Heater costs less than lots of other appliances around the modern home and does more. Compare it with a washing machine, vacuum cleaner or electric refrigerator, for instance. These things are used but once or twice a day, some, as the washing machine, possibly once a week. An automatic water heater is used almost every hour of the day and a good many hours of the night and helps, not one member of the family, but renders service, convenience and comfort to everyone in the household.

## PRICES SERIES "B"

## PRICES SERIES "C"
