EXPERIMENTS ARE PAST

GENERAL ELECTRIC Refrigerator

is trouble-free for all-time

Every General Electric Icing Unit is assembled in a dust-proof room—like the mechanism of the most precise scientific instruments. Every step is tested.

The refrigerating fluid and a permanent supply of oil are sealed in. More tests are made. Once it leaves the General Electric factory, no one has any further assembling to do.

That's why we can stand behind each General Electric Refrigerator with a guarantee.

Clare C. Bohenski Piano Pupils Present Recital

An audience of 300 which filled Sacred Heart School hall, Hubbard Woods, enjoyed the piano recital Tuesday evening, given by the pupils of Miss Clare C. Bohenski, of 430 Adams avenue, Glencoe, of the Mandy school of music, assisted by Mr. and Mrs. Frank P. Mandy, Lucille Geyer, Maurice Ellis and Russell Luce, the latter of Glencoe. The recital was for the benefit of Sacred Heart church.

It was one of the most delightful of the many recital programs given by Miss Bohenski's pupils.

The trio by John Mathison, Joseph Herzig and George Hunt who played "Stars and Stripes Forever," by Sousa, was a particularly pleasing number, as was also the "Dixie" trio by Loretta Bohenski, Jean Richardson and Dorothy Kirby.

All numbers on the program were equally good and received the applause which their rendition by these young artists deserved.

Paul Reynolds to Preach at Congregational Church

The Rev. Paul R. Reynolds it is announced will preach at the morning worship at the Winnetka Congregational church, Sunday, which, it is said, will probably be his last time before returning to China in the fall.

He wishes especially to speak of the effects of the action of this church on the question of military protection for missionaries, and, it is said, has some most interesting news on this matter from Jerusalem.

Lester E. Barker of 969 Willow road is an added member to the Winnetka police department, beginning his service June 1 with assignment to squad No. 1, with Sergeant Ed Cummings.

ANTI-MOSQUITO WORK PROGRESSING RAPIDLY

Twenty-two Abatement District Men at Work; Sanitary District Men Also Busy

In addition to the work which the Sanitary district is doing in the way of opening up the waterways in the North Shore Mosquito Abatement district as related elsewhere in this paper, Superintendent William Edwards, of the Mosquito Abatement district, has a large force of men following up, cleaning out the dynamited water courses, seeking out and oiling mosquito breeding places, and in various ways carrying out the details of the campaign which is now in full swing to eradicate the mosquito pest from the entire north shore area.

Some of the work accomplished by the Mosquito Abatement district squads is told in the report of Mr. Edwards to the District board of trustees at its recent meeting.

On May 2 he put on one foreman, Archie Hall, whom he started over the district, locating mosquito breeding places and "spotting" them on a map.

A week later a second foreman, Charles Roczani, and two field workers, one a truck driver, were started out.

Two trucks were put into service at this time, and on the following day the force of men was increased to two foremen and nine men, which has been gradually enlarged, as demand for their work was created by the advancing dynamiting gang, until at present the two foremen have a force of twenty-five men.

Work was started, according to the report of Superintendent Edwards, at the county line, at the north end of the district. They have oiled the swamps and cleaned and oiled the ditches, from this point south to Winnetka avenue, east of the Chicago & North Western tracks. They have also cleaned out and oiled the ditches on the County line road to the railroad tracks; Willow road and Hibbard road from Tower road to Wilmette avenue; Winnetka avenue from the Skokie ditch to the railroad tracks and Happ road.

Men are also now working through the Glenview territory, into Golf; Tessville and Morton Grove, cleaning the brush and fallen trees from the river and oiling swamps and ditches.

Similar treatment has been given three ravines in Hubbard Woods; a ditch over on Pfingston road; a ditch running from a new sub-division in Glenview to the middle fork of the river; and a Kenilworth ditch.
