

"Do You Remember 'Way Back When'?"

EverHot
AUTOMATIC
WATER HEATER

Saturday Night Was Bath Night?
The Bath Water Was Heated in the Tea Kettle?
The Bath Tub Was Known as the Wash Tub the Balance of the Week?

Since the advent of the EverHot Automatic Gas Water Heater and modern plumbing, old time bathing facilities have as little place in the modern home as the cuckoo clock or the mustache cup.

With an EverHot in the basement, every night is Saturday night. An abundance of hot water always ready for any and every purpose with no more effort than turning a faucet.

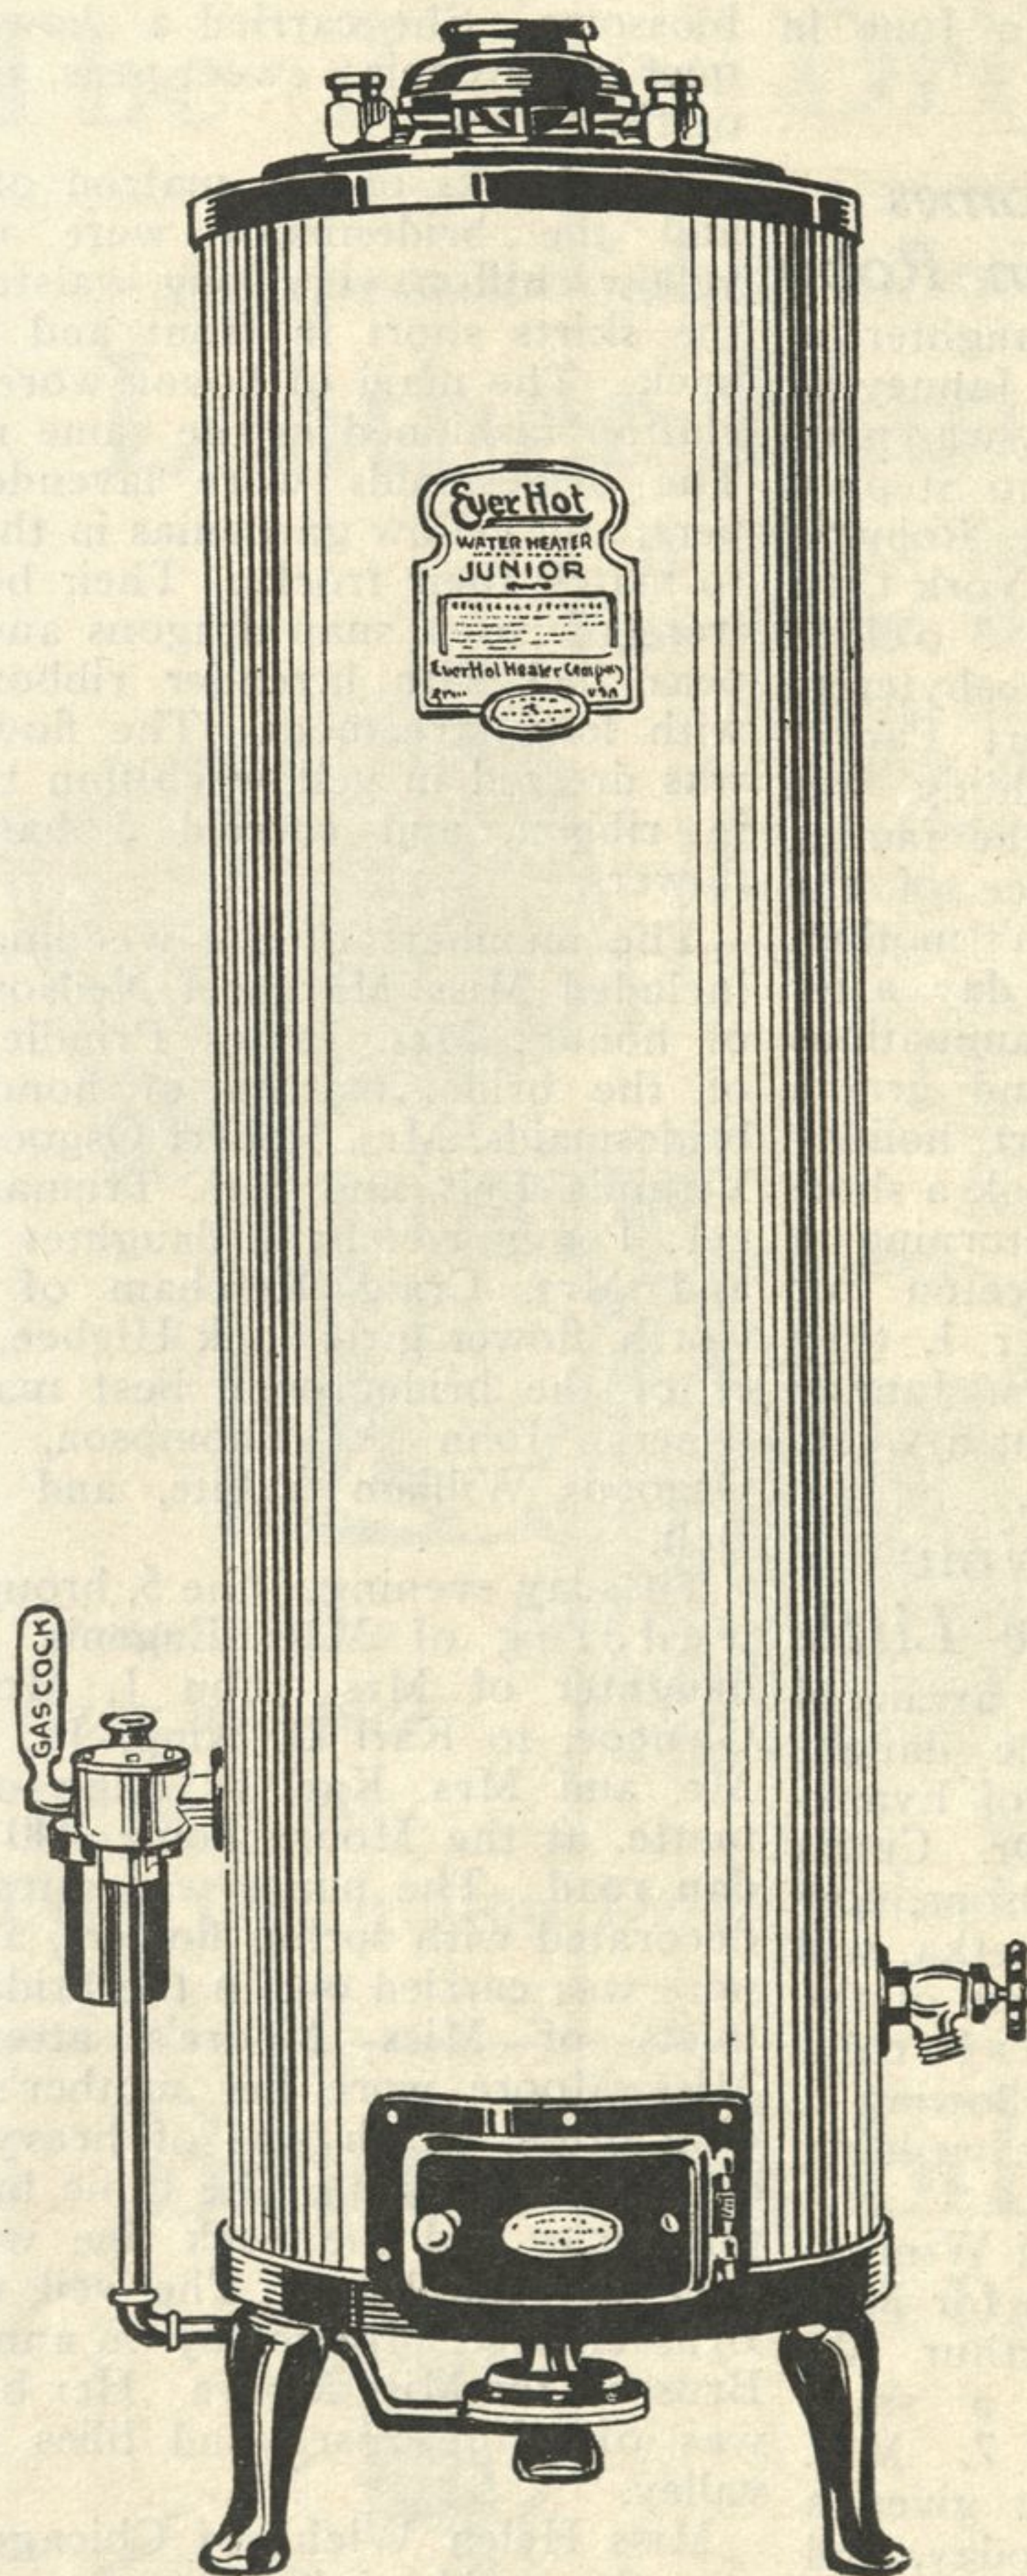

Why try to get along with a "Way Back When" water heating system that went out of style with tin type pictures and high wheel bicycles?

A tank heater that you sometimes remember to light but generally forget to turn off—a coal heater where the fire is nearly always out are no more old fashioned than a horse and buggy on Sheridan Road or a hitching post in front of the Orrington Hotel.

The EverHot Automatic Gas Heater is the modern method of heating water. There is a size for every home and a price for every purse.
